ABSTRACT

More than 7,000 adults were interviewed to determine attitudes Americans have toward their urban areas and to assess the quality of life in the United States. This volume presents a compilation of data gathered through the interviews. The volume is organized into five sections. Section A provides information related to community satisfaction, attributes of kinds and sizes of communities, assessments of past American urban life, and projections of future community characteristics. Information on what Americans see as the specific problem affecting their communities and how they evaluate the severity of those problems is provided in Section B. The frequency with which neighbors interact and preferences for neighborhood composition are focused on in Section C. Section D contains data concerning public use of facilities, work location, and commuting patterns. Section E describes Americans' evaluations of public services and governmental involvement with those services. Section F gives data on preferences about place of residence and housing type. Section G describes changing community trends and their impact on residential preferences. (Author/MK)

TABLE OF CONTENTS

FOREWORD vii
I. INTRODUCTION 3
II. SECTION A: THE QUALITY OF URBAN LIFE 21
What are the perceived advantages and disadvantages of cities, suburbs, small towns and rural places? 24
How do people feel about their place of residence? 62
Have cities been changing for the better or for the worse? 164
Would America be a better place without cities? 202
III. SECTION B: COMMUNITY PROBLEMS FACING AMERICANS 213
What community problems are most troubling to Americans? 216
IV. SECTION C: THE SOCIOLOGY OF AMERICAN NEIGHBORHOODS 261
How often do neighbors get together? 264
What kinds of people do Americans prefer to have as neighbors? 274
Do Americans prefer to live in integrated or segregated neighborhoods? 292
V. SECTION D: HOW AMERICANS USE THEIR CITIES AND SUBURBS 303
Where do people spend their time — in the cities or elsewhere? 306
Where do people work and how do they get there? 382
VI. SECTION E: THE PERFORMANCE OF GOVERNMENT 403
How good are local public services? 406
Is the government responsive to the people? 442
How efficient or wasteful is the government? 454
Who should pay for public services and who should run them? 536

VII. SECTION F: THE RESIDENTIAL AND HOUSING PREFERENCES OF AMERICANS 551
- Where do Americans want to live? 554
- Where do parents want their children to live when grown up? 566
- Why did people choose their current place of residence? 576
- What kinds of housing do people prefer? 620

VIII. SECTION G: CHANGING COMMUNITY TRENDS AND THEIR IMPACT ON RESIDENTIAL PREFERENCES 647
- Are local conditions changing for the better or worse? 651
- What might cause people to change their place of residence? 708
- How many Americans plan to move in the near future? 734

IX. APPENDIX 757
- Questionnaire 759
- Other Reports Prepared by the Division of Policy Studies 783
- Guide to Subjects 787

foreword

Foreword

When first considered, the 1978 survey on the quality of urban life was intended for federal policymakers. We wanted to bring to the conference table, where the Urban and Regional Policy Group sat hammering out recommendations on urban policy, the most complete and reliable accounts possible of American attitudes toward the city.

That has been done. And the response to the President's urban policy message demonstrates it was well done. Now we want to share with the American public — and with scholars, public interest groups, state and local government officials, and those who deliver social services — the complete results.

The survey is so detailed, and on so large a scale, that I am reminded of the blind men and the elephant. Feeling a leg, one blind man said, "Oh, the elephant is like a pillar." "Nonsense," said another touching the elephant's great trunk, "it is like an enormous snake."

It is possible to grasp only the snake or the pillar of this survey and thus be misled about the shape of the whole. One cannot stop with the observation that large majorities perceive cities to be crime-ridden, with bad schools, deteriorating housing, and high taxes. Given that, we might conclude with the doomers and gloomers that the cities have had it; that their day, function, and magnetism are over.

But that is not the case. For against those findings we must set those equally large majorities who see the city as offering the best career opportunities, the best colleges and universities, the most cultural activities, the best selection of movies and restaurants, the best hospitals and health care. Furthermore, a majority believe that the country would be worse off than it is now were the city to disappear.

Whatever the final truth about the elephant, we know it must be very complicated and many-sided.

We share this data book with you in expectation of setting off a period of self-examination. It will be solidly based. The questions here are far-ranging, detailed, and sharply focused. The answers are sometimes expected, sometimes surprising, always as accurate a tally of national perceptions as scientific polling methods and a sample (possibly the largest of this kind ever surveyed) of more than seven thousand respondents can make them.

A final note—the following people contributed substantially to the development and production of this Data Book: Martin Abravanel, Diane Dilger, Jan Erickson, Norris Evans, Michael Goldstein, Howard Greene, David Kaminsky, Ruth Limmer, Paul Mancini, Lester Rubin, Eric Stowe, and Chris Wye.

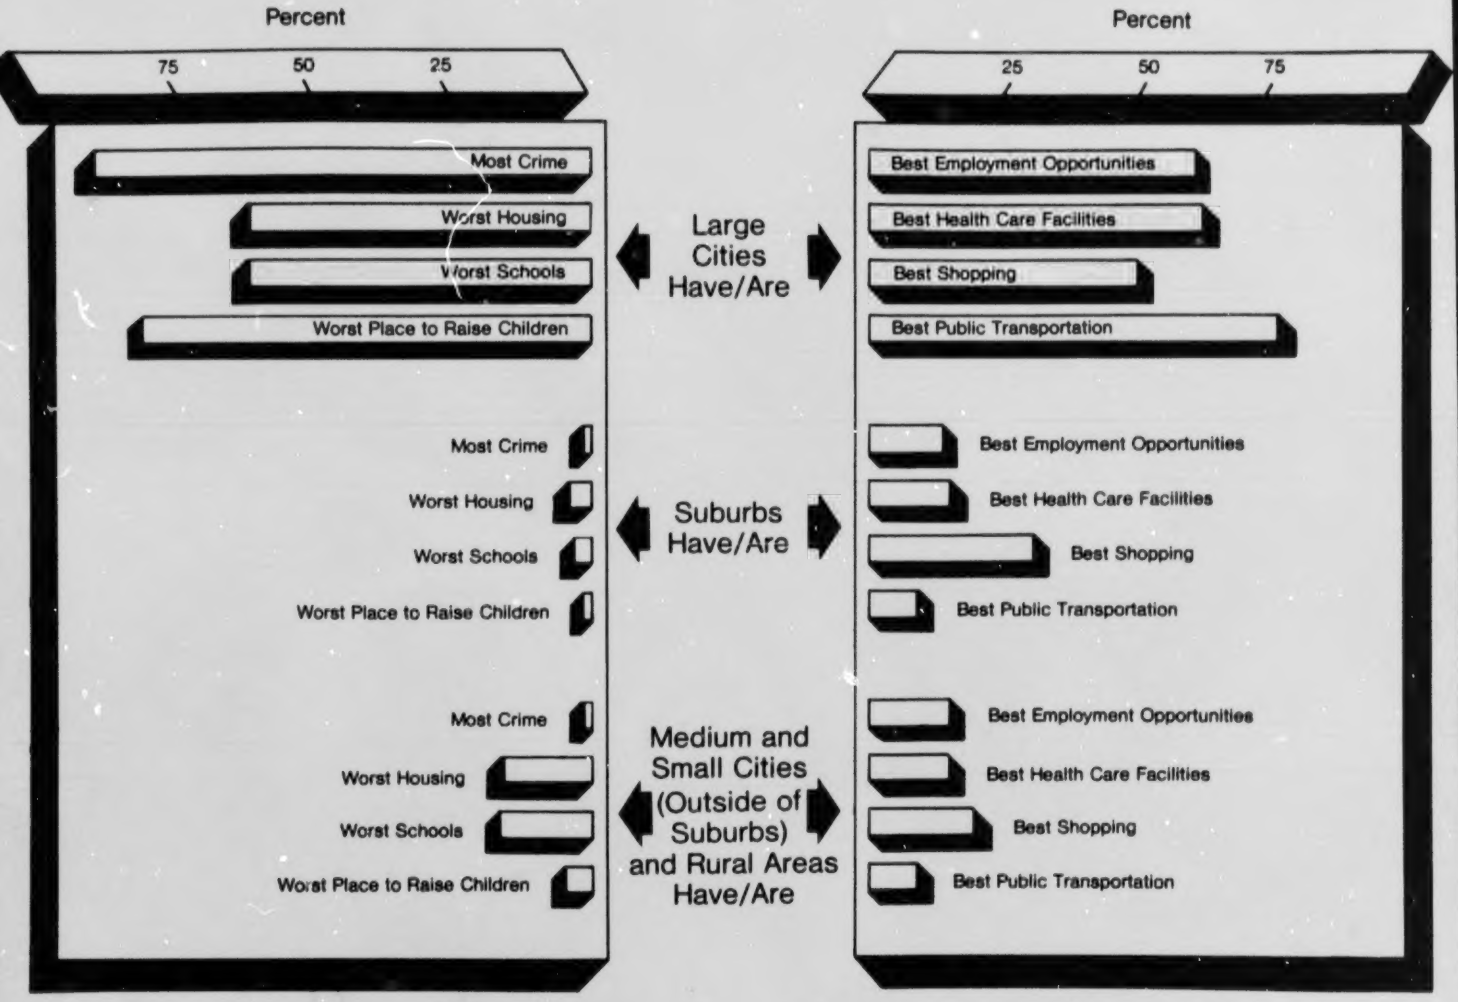
Americans' Perceptions of Selected Attributes of Large Cities, Suburbs, Other Cities and Rural Areas



General Introduction

This volume is a data book, a resource book, a book that tells what Americans think about the communities in which they live. It is a public assessment of the quality of life in America.

To arrive at such an assessment, more than seven thousand people — selected to represent the nation as a whole — were asked about their present views of the city, about how their views have changed, and about what they expect from the city in the future. Their answers provide us with an implicit evaluation of the effectiveness of past policies and a foundation upon which future policies can be developed.

The survey is the result of two things: President Carter's pledge to formulate a comprehensive urban policy, and his determination that citizens everywhere have input into the deliberations that would produce such a policy.

Under the direction of Patricia Roberts Harris, Secretary of the Department of Housing and Urban Development, the cabinet-level Urban and Regional Policy Group, which prepared administrative and legislative recommendations for President Carter's 1978 urban policy message, sought citizen input in several ways. State and local government officials, civil rights and corporate leaders, public interest and volunteer groups, business executives, and labor leaders were consulted. Public meetings were held throughout the nation to provide forums for the expression of public sentiment. Finally, to assure the widest possible representation of opinion, the Department of Housing and Urban Development commissioned Louis Harris and Associates, one of the country's best known polling firms, to do an extensive survey of public views and concerns about the nation's cities, suburbs, small towns, and rural areas.[1]

This book contains a large portion of the data collected during that survey.[2] We hope it will be useful to the widest possible audience — the very audience whose views, concerns, and preferences were solicited.

The volume is intended to raise questions and provoke discussion and to stimulate some self-examination. The information it contains offers a starting place, a point of departure. It tells us about how we relate to the communities in which we live and work and play — what we think about them and how we behave in regard to them. And what we learn, among other things, it is that there are many contrasts, many apparent inconsistencies, and many puzzles.

---

[1] Louis Harris, David Neft, and Mark Schulman of Louis Harris and Associates directed the survey. Data management for this volume was by Mark Samblanet of JWK International Corporation.

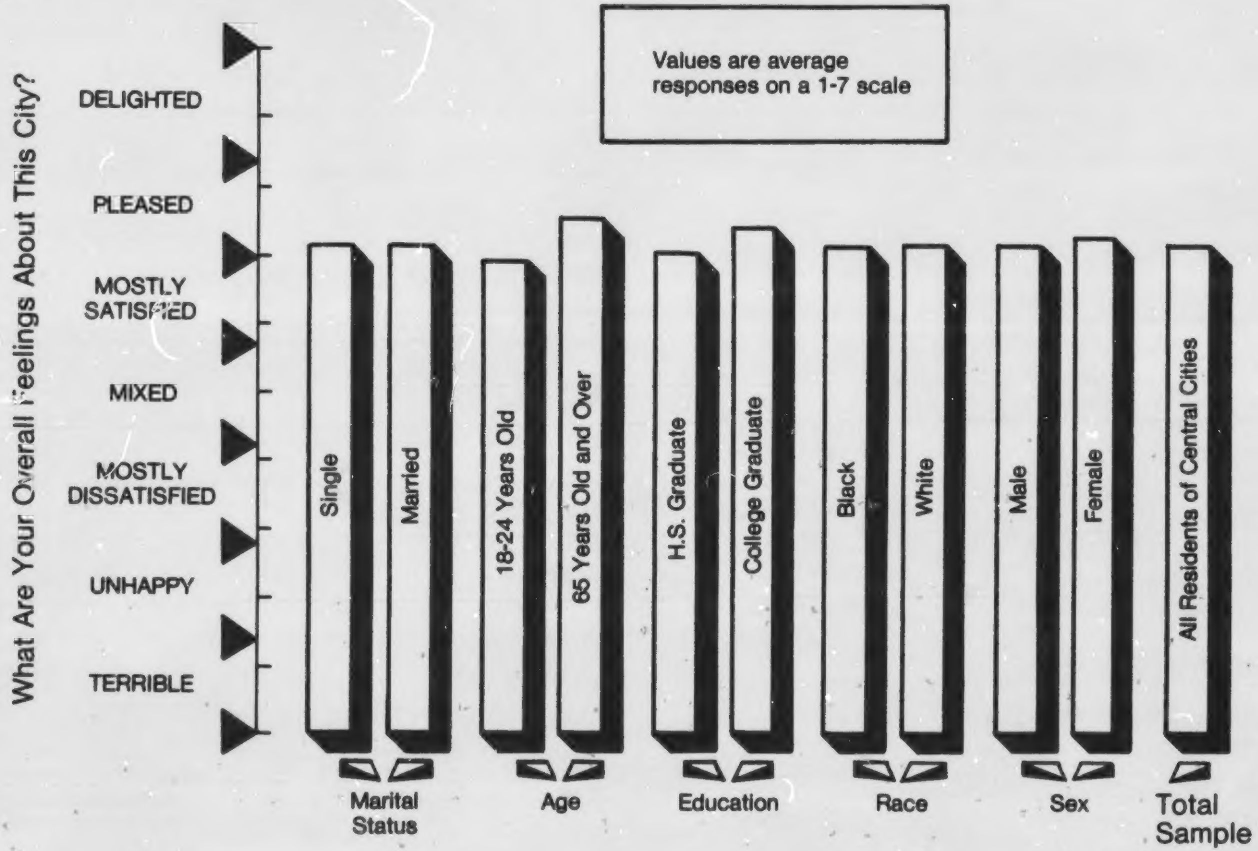
Satisfaction With Cities Is Widespread Among Central City Residents



14

For example, as seen through the eyes of the American citizenry, the nation's large cities present a paradox: at one and the same time they represent some of the best and some of the worst in American life. Americans view cities as places of culture, opportunity, and amenities but also as places characterized by crime, unemployment and deteriorated housing. Cities are seen as both resource centers and as distressed areas. To its residents, the city is also a place of stark contrasts. Living in close proximity to the best and the worst may help to explain why many urban dwellers are, in one sense, relatively satisfied with their communities but, at the same time, believe that life is better in a less urban setting.

Our view of the non-urban America is also fraught with contrasts. On the one hand, we still hold to a belief in the virtues of rural and small-town life. We perceive towns and rural areas as having the least crime, the lowest taxes and cost of living, as being the best places to raise children and the best places to live. At the same time we believe that they offer little in terms of employment opportunities, medical facilities, cultural opportunities, higher education, public transportation, and shopping facilities.

What does this mean in terms of behavior? Again, some contrasts are evident. On the one hand, we prefer rural life and envision it to be more healthful and congenial than urban life. On the other hand, we recognize that actual moves to such areas are unlikely because our residential selection is strongly influenced by the availability of certain kinds of jobs and housing. Many people simply do not think that the right kinds of employment and shelter are present in small towns and rural areas.

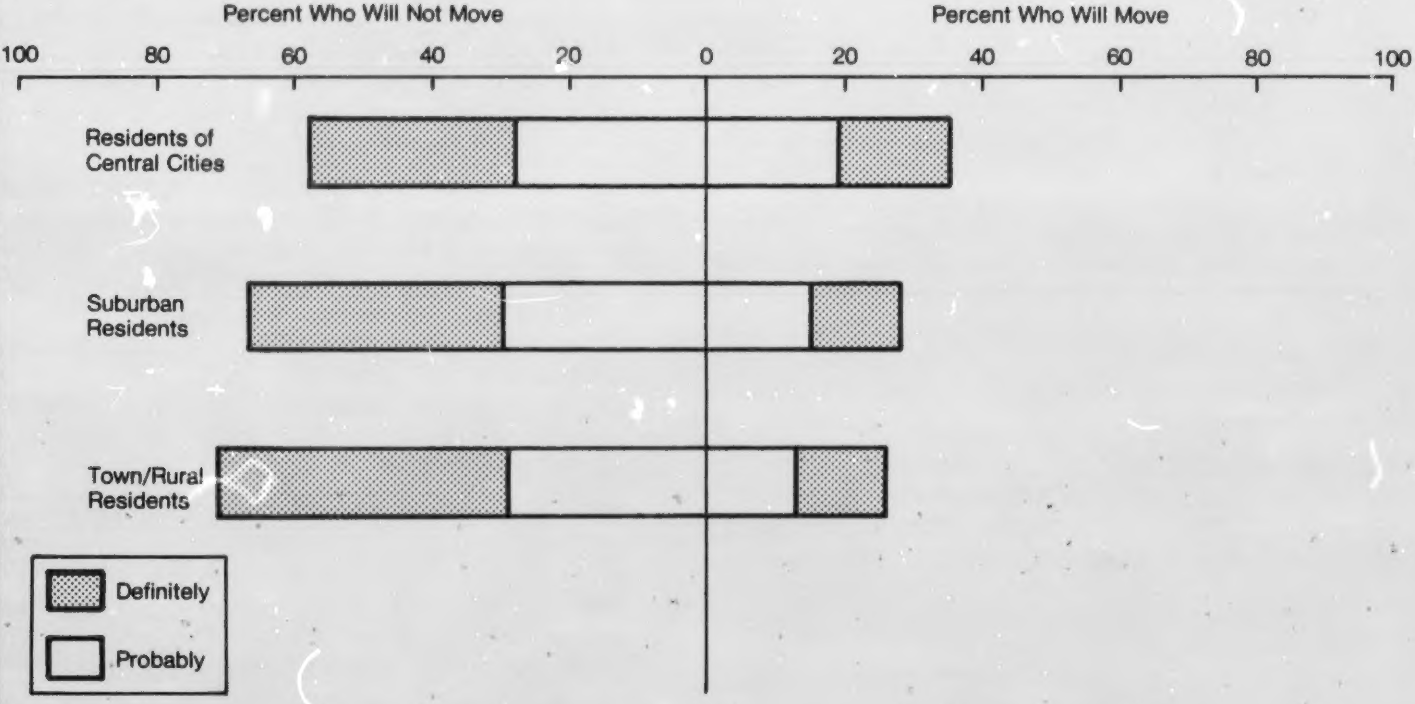
Our beliefs, our preferences and our values, in isolation, therefore, do not necessarily determine our behaivor. To further illustrate, Americans frequently express a preference for heterogeneity, for neighborhoods where there is a diversity of education, income, age, religion, ethnic background, political attitudes and race. But despite a substantial public commitment to diversity, most of us continue to live in racially and economically homogeneous neighborhoods.

Finally, how do our attitudes toward our neighbors and community affect the likelihood that we will stay in or move from our current places of residence? And if we move, where do we intend to go? Here the data on community images are quite suggestive, particularly with respect to urban America. Public images of the American city apparently bear the imprint of the city's past as well as its present. As such, many of the benefits and satisfactions that have traditionally been associated with city life exist in sharp contrast to the social and physical deterioration often perceived to be occurring in the contemporary city, suggesting a tension between what was

Graph 3

A Majority of Americans Say They Will Not Move in the Next Several Years—However, as Many as Three of Every Ten May Move

Likelihood of Moving in the Next Two or Three Years, by Respondent Locale



and what is. Today, adverse circumstances are clearly affecting the lives of city dwellers as well as those who live in the suburbs—including people whose images of the city's past are overwhelmingly positive. This has various implications.

There are, of course, many urban residents who are fully commited to, and enthusiastic about remaining in the city. But, in reaction to some of the more negative aspects of city life, there are others who either contemplate leaving the city or experience the frustration of not being able to leave. Moreover, the survey reveals that when the number of persons intending to move out of larger cities is balanced against those intending to move in, it appears as if there will be a continuation of the flow out of the cities and toward the suburbs and rural areas for some time to come. For new urban residents and those who remain, future well-being will depend in large part on changes that are now and will continue to affect the character of the nation's cities.[3]

Fundamental shifts in population and in the economic base of the city have profound impacts on its inhabitants and significant long-term effects on how the city is perceived. When these shifts are in a negative direction—declining incomes, increasing unemployment and population losses — the city is seen as lacking vitality. Both the changing circumstances *and* the perceptions of the city, then, become important. Because images often tend to take on a reality of their own, they actually help to perpetuate the very problems they identify. As a consequence, contemporary social and economic shifts that are adversely affecting the city take on a significance that extend well beyond the present.

In themselves, then, the data in *The 1978 HUD Survey on the Quality of Community Life* are fascinating and extremely important. They tell us more than we have ever known before about how Americans view the conditions and problems of their communities. They raise issues which deserve further examination, additional probing, and much discussion and thought. They can be used as benchmarks to gauge and monitor the direction of future social and attitudinal changes — changes in the quality of community life.

Description of Survey

Between December 1, 1977, and January 10, 1978, Louis Harris and Associates, working in close collaboration with staff of HUD's Policy Studies Division, conducted 7,074 one-hour interviews with adults, 18 years old and over, across the country. The questionnaires, which contained both open-ended and closed responses, covered over 250 items.

The following definitions were used to stratify the sample:

		Sample Size % (unweighted)	of Weighted sample
(1) City	Every place defined by the Bureau of the Census as a central city of an SMSA[4].	3298	31%
(2) Suburb	Every place that is not a central city but is within an SMSA as defined by the Bureau of the Census.	3229	39%
(3A) Town	Every city, town or village with a 1970 total population of at least 2,500 that is not within an SMSA.	547	30%
(3B) Rural	Every place that is not included in any of the three categories listed above.		
	Total	7074	100%

---

[4] Except in the New England States, a standard metropolitan statistical area (SMSA), as defined by the Bureau of the Census, is a county or group of contiguous counties that contain at least one central city or "twin cities" of 50,000 or more inhabitants. In addition to the county or counties containing such a city or cities, an SMSA includes other contiguous counties if they are socially and economically integrated with the central city or cities. In New England, SMSAs consist of contiguous towns and cities rather than counties. The population of an SMSA is referred to as the metropolitan population; those living outside of SMSAs are designated as the non-metropolitan population.

To ensure the broadest coverage and the lowest sampling error, the Harris group interviewed in 650 locations throughout the nation. Three hundred of these areas were in cities, 300 in suburbs, and 50 in towns and rural areas. Harris sought to complete 13 interviews in each interviewing area.

The estimated maximum sampling error for the total sample, including the effect of clustering, is 2.4 percentage points. For the city and suburban strata it is 2 percentage points each, and for the non-metropolitan stratum it is 4.9 percentage points.

Organization of This Volume

This Data Book is divided into seven sections each containing charts and tables that are based on several questions from the survey. The sections are:

Section A — The Quality of Urban Life

This section includes questions and answers relating to the various degrees of community satisfaction, comparative evaluations of the attributes of various kinds and sizes of communities, assessments of what urban America used to be like, and projections of community characteristics in the future.

Section B — Community Problems Facing Americans

This section contains information on what Americans see as the specific problems affecting their communities and how they evaluate the severity of those problems.

Section C—The Sociology of American Neighborhoods

In this section there is information on the frequency with which neighbors get together and preferences for neighborhood composition.

Section D — How Americans Use Their Cities and Suburbs

This section contains data on the public's use of various facilities inside and outside of cities. It also includes data on work location and commuting patterns.

Section E — The Performance of Government

This section describes what Americans think about the quality of local public services and the degree to which they think the various levels of government are responsive or wasteful. It also delineates their preferences for which level of government should fund and administer a variety of public services.

Section F — The Residential and Housing Preferences of Americans

This section gives data on where Americans want to live and where they want their children to live. It provides information on the factors which influence their locational decisions and describes the types of dwelling units people prefer.

Section G — Future Expectations

This section tells what Americans think about how conditions and services in their communities have changed in the last two years and how they will change in the next two years. It also tells of their plans to move in the near future.

Interpreting the Tables and Graphs

The answers to each of the survey questions included in the seven sections are given for the total sample and then for selected subgroups.[5] The tables contain an abbreviated form of the questions asked of respondents; they appear on the left side of the page and are preceded by the question number in parentheses. Readers who wish to see the question exactly as it was worded in the original questionnaire can turn to the Appendix which contains all of the items in the order in which they were asked. The number in parentheses at the top of each column of data is the number of respondents answering that question. Charts in the data book present selected data that have been extracted from tables that immediately follow the charts.

The following population breakdowns are used for each question:

1. *Region:* We follow the standard Census Bureau designations. The four regions and the states that comprise them are:
   - A. Northeast: Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Pennsylvania.
   - B. North Central: Ohio, Indiana, Illinois, Michigan, Wisconsin, Minnesota, Iowa, Missouri, North Dakota, South Dakota, Nebraska, Kansas.
   - C. South: Delaware, Maryland, District of Columbia, Virginia, West Virginia, North Carolina, South Carolina, Georgia, Florida, Kentucky, Tennessee, Alabama, Mississippi, Arkansas, Louisiana, Oklahoma, Texas.
   - D. West: Montana, Idaho, Wyoming, Colorado, New Mexico, Arizona, Utah, Nevada, Washington, Oregon, California, Alaska, Hawaii.
2. *Location:* Respondents are grouped according to their actual place of residence as defined by the Bureau of the Census. Respondents reside:
   - A. Within a central city (See Footnote 3 for definition).

---

[5] When reviewing the tables, the reader should be aware of several points. First, the data were not checked for certain kinds of inconsistencies or for the "reasonableness" of the responses. For example, if a respondent reported that he or she purchased a major appliance on a daily or weekly basis, this response was not modified or deleted. Secondly, for certain questions, some subgroups contain extremely small numbers of respondents. These subgroups have been included in the tables, but interpretations based on a very small number of respondents are subject to bias due to very high sampling error. Third, all numbers and percentages appearing in this volume are derived from a sample which was weighted using demographic and locational characteristics so as to be representative of the population distribution in the country as a whole. For additional technical details on this or other aspects of the survey contact the Division of Policy Studies, U.S. Department of Housing and Urban Development, Washington, D.C. 20410.

B. Outside a central city, but within a Standard Metropolitan Statistical Area (SMSA). These people are referred to as residents of suburbs in the text and charts that follows.

C. Outside of an SMSA. These people are referred to as residents of towns and rural areas.

3. *Self-Designated Location:* Respondents were asked which type of community best described the place where they live, given the following following options:

   A. Large city (population of 250,000 or more).

   B. Medium-size city (50,000 to 250,000 population) in the suburbs.

   C. Medium-size city (50,000 to 250,000 population) not in the suburbs.

   D. Small city, town or village (under 50,000 population) in the suburbs.

   E. Small city, town or village (under 50,000 population) not in the suburbs.

   F. Rural area.

4. *Longest Childhood Location:* Respondents were asked which type of community they lived in the longest when they were growing up. The options are the same as those listed in #3.

5. *Occupation of Head of Household:* Each respondent was asked to indicate who was the head of the household and to describe fully that person's job and type of duties. The responses are categorized as follows:

   A. Manager: (i.e., Official, inspector, manager, proprietor, self-employed retailer, department store buyer and department head, building manager and superintendent, postmaster, purchasing agent, administrative official, union official).

   B. Professional: (i.e., Accountant, auditor, airplane pilot, architect, creative artist, musician, designer, author, clergyman, teacher, professor, educational administrator, physician, dentist, veternarian, nurse, pharmacist, therapist, engineer, editor and reporter, lawyer, librarian, photographer, social welfare worker, surveyor).

   C. Sales, Clerical: (i.e., Salesman and saleswoman, sales clerk, advertising agent and salesman, insurance agent, real estate agent, stock and bond salesperson, agent, bookkeeper, bank teller, cashier, file clerk, insurance adjuster, mail carrier, payroll clerk postal clerk mailman, receptionist, secretary, typist, telephone operator, ticket agent, shipping and receiving clerks).

D. Craftsman: (i.e., boilermaker, bookbinder, brickmason, cabinetmaker, carpenter, electrician, engraver, foreman, lineman, millwright, plumber, printer, mechanic, repairman, paperhanger, shoemaker, tailor, optician, furrier, member of the armed forces)

E. Service, Unskilled (Except Farm): (i.e., Barber, bartender, cook, counter worker, elevator operator, hairdresser, cleaner, waiter and waitress, kitchen worker, maid, usher, porter, policeman, firefighter, guard, watchman, sheriff, private household worker, housekeeper, babysitter, truck driver, mine worker, dressmaker, parking attendent, laundry worker, sailor, bus-taxi driver, railway motorman, brakeman, apprentice, assembler, deliveryman, grader and sorter, textile knitter, welder, unskilled laborer, fisherman, gardener, warehouse worker, longshoreman, meat-cutter).

F. Farmer: (including farm manager and farm laborer).

6. *Marital Status:* Four categories are used:

   A. Single

   B. Married

   C. Widowed

   D. Divorced/Separated

7. *Age:* Respondents are divided into five age categories:

   A. 18 to 24 years of age

   B. 25 to 34 years of age

   C. 35 to 44 years of age

   D. 45 to 64 years of age

   E. 65 years and over

8. *Level of Education:* All respondents were asked to state the highest grade of school that they actually had completed. Responses are categorized as:

   A. 8 years or less of school completed.

   B. 9-11 years of school completed.

   C. High school graduate (12 years of school completed or equivalent.

   D. Some college (1-3 years of college completed).

   E. College graduate (4 years of college completed).

   F. Postgraduate (4 years of college and at least 1 year of graduate school completed).

9. *Total Family Income:* Respondents were asked to state their total family income for 1977. They were told that all family income

before taxes, whether earned or received, including welfare and other benefits, pension, stocks, bonds, real estate and other investments, and income from a business, should be considered. Responses are categorized as follows:

A. Under $5,000

B. $5,000 to $9,999

C. $10,000 to$14,999

D. $15,000 to $19,999

E. $20,000 to $29,999

F. $30,000 and up

10. *Tenure:* Respondents were asked whether they lived in a single-family detached, single-family attached, or two-family house, or in an apartment in a low-or high-rise building, and whether they or someone else in the household were:

A. Owners

B. Renters

11. *Race/Ethnic Group:* The following racial or ethnic designations, as determined by the interviewer, are:[6]

A. Black

B. White

C. Hispanics[7]

12. *Ages of Children Living At Home:* Survey respondents were asked the age(s) of their child/children living at home. The responses are divided into the following categories:

A. Child/children under 5 years of age living at home.

B. Child/children between the ages of 5 and 18 living at home.

C. Child/children over the age of 18 living at home.

D. Multiple categories of children living at home (i.e., children in either two or all three of the above listed age groups).

E. No children living at home.

[6] The sample also included 65 American Indians and Alaskan natives and 69 Asians and Pacific Islanders. These subsamples are too small to be useful for statistical analysis and are therefore not presented as separate ethnic/racial categories.

[7] The number of Hispanics represented in this survey (n=262) may be too small to be representative of the total Hispanic population of the United States. However, data for Hispanics have been included for purposes of comparison with black and white subgroups. The Department of Housing and Urban Development intends to undertake additional analysis of the views and concerns of Hispanics toward the communities in which they live.

13. *Sex* of Respondent.

14. *Neighborhood Racial Composition:* Respondents were given the following options and asked to identify which answer best described the racial composition of their immediate neighborhood:

    A. All white

    B. Mostly white

    C. About half white and half minority

    D. Mostly minority

    E. All minority

15. *Local Population Change 1970-1975:*[8] The total population change between 1970 and 1975, based on U.S. Census data for the community in which each respondent lives, is coded into the following categories:

    A. -50 to -10.1 percent population loss (i.e. the community lost between 10 to 50 percent of its population).

    B. -10.0 to 0 percent population loss.

    C. 0.1 to 10.0 percent population gain (i.e. the community experienced a population gain of between 0 to 10 percent).

    D. 10.1 to 25.0 percent population gain.

    E. 25.1 percent or more population gain.

16. *Local Per Capita Income, 1974:*[9] The mean per capita income for 1974, based on data compiled by the Office of General Revenue Sharing for the community in which each respondent lives, is coded into the following categories:

    A. $0 to $3,999

    B. $4,000 to $4,499

    C. $4,500 to $4,999

    D. $5,000 and up

17. *Local Percent Below Poverty Level, 1970:*[10] The percent of the population in the respondent's community who are at or below the poverty level[11] is coded into the following categories:

---

[8] These community-level data were obtained from data files maintained by HUD. Below the county level they are generally only available for incorporated areas and, therefore, for only a portion of the sample. Data were not available for approximately 40 percent of the suburban sub-sample and 40 percent of the rural sub-sample.

[9] *Ibid.*

[10] *Ibid.*

[11] This variable is calculated by dividing the number of persons in the community who were below the poverty level as reported in the 1970 Census by the community's 1975 population.

A. 0 to 4.9 percent of the population below the poverty level.

B. 5.0 to 9.9 percent of the population below the poverty level.

C. 10.0 to 14.9 percent of the population below the poverty level.

C. 10.0 to 14.9 percent of the population below the poverty level.

D. 15.0 percent and up of the population below the poverty level.

18. *Local Unemployment Rate, 1976:*[12] The rate of unemployment for 1976, is based on data compiled by the Bureau of Labor Statistics of for the jurisdiction in which the respondent lives, is coded into the following categories:

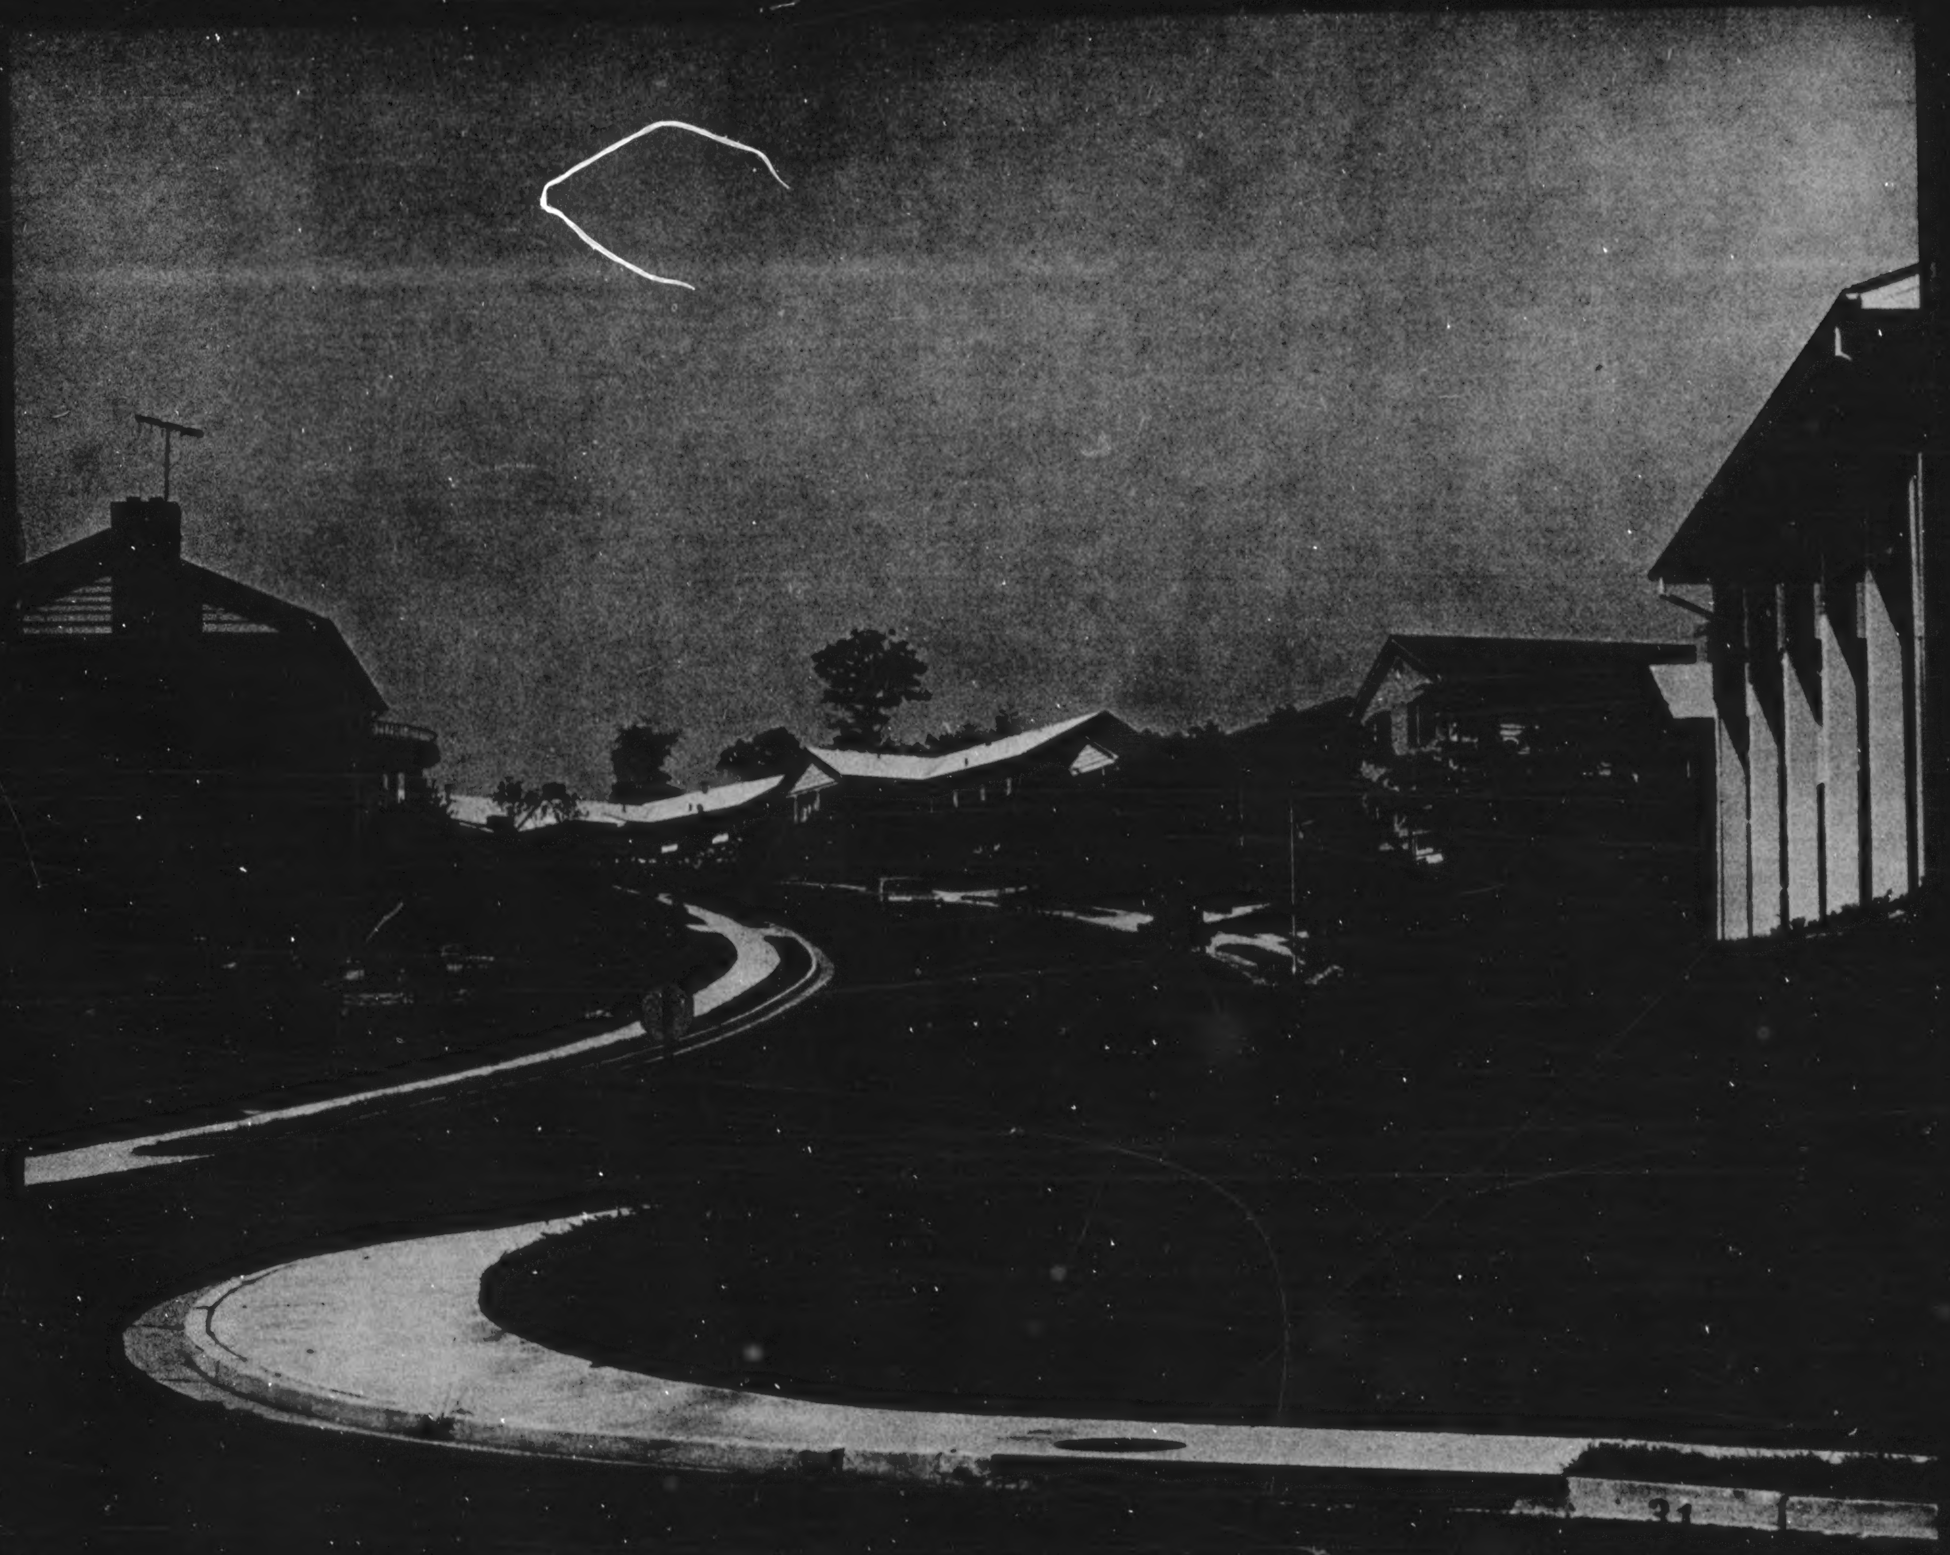
A. 0 to 5.0 percent unemployment

B. 5.1 to 7.0 percent unemployment

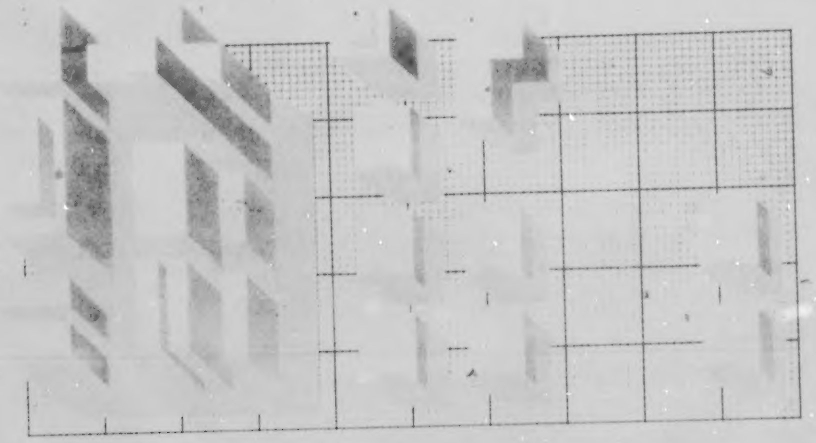
C. 7.1 to 9.0 percent unemployment

D. 9.1 percent or more unemployment

[12] These data were not available for approximately 25 percent of the suburban sub-sample and 90 percent of the rural sub-sample.



31



The Quality of Urban Life

How do people feel about their place of residence?

What are the perceived advantages and disadvantages of cities, suburbs, small towns and rural places?

Have cities been changing for the better or for the worse?

Would America be a better place without cities?

How Do People Feel About Their Place of Residence?

The amount of satisfaction people derive from their place of residence is a measure both of community health and vitality and of the individual's sense of well-being.

From the community perspective, one can ask which kinds of places—large cities, smaller cities, suburbs, small towns or rural areas—give their residents the most satisfaction.

From the individual perspective, one can ask which kinds of people — for example, young or old, married or single, home owner or renter, black, white or Hispanic — are most satisfied with life in their community.

Question 5 asked Americans to indicate if they are "delighted," "pleased," "mostly satisfied," "have mixed feelings," are "unhappy," or feel "terrible" about their community.

They were asked how they would feel about their community if they considered only its available recreational, entertainment, or other leisure-time activities, its beauty and attractiveness, their personal sense of security, their acceptance by other people, its suitability as a place to raise children, and how they feel about their own house or apartment.

Those who live in central cities were also asked how they generally felt about the particular neighborhood in which they lived.

Some Highlights of the Data

- A large majority of all Americans feel positively about their community. Community satisfaction is expressed by a somewhat higher proportion of suburban and small town/rural residents (88% and 87%, respectively) than residents of central cities (71%).
- Among residents of central cities, older persons are more likely than young people and homeowners are somewhat more likely than renters to be satisfied with their community. There are small or no differences between single and married persons and among blacks, whites and Hispanics.
- While 81 percent of the people who live in central cities express satisfaction with their house or apartment and 77 percent are satisfied with their neighborhood, only 45 percent have positive feelings about the safety afforded them in the city.

What Are The Perceived Advantages of City, Suburban and Small Town/Rural Life?

Many Americans see substantial differences among cities, suburbs, small towns and rural places with respect to the amenities, services, facilities, problems, opportunities and life styles that each provides. These perceived differences may or may not really exist; however, if they believe the differences to exist, people are likely to react to these places accordingly. Reactions can include anything from personal behavior — such as living or working in one type of place as opposed to another — to policy preferences — such as a willingness to allocate public resources to one type of place over another.

What do Americans believe to be the condition of life in the nation's cities, suburbs, small towns and rural areas? What are the perceived advantages and disadvantages of each?

Question 14 asked respondents to indicate which type of place — large cities; medium sized cities in the suburbs; medium sized cities not in the suburbs; small cities, towns or villages in the suburbs; small cities, towns or villages not in the suburbs; or rural areas — offered the best or worst, highest or lowest of the following:

Shopping facilities
Racial discrimination
Health care facilities
Parks and playgrounds
Housing you can afford
Colleges and universities
Public transportation
Employment opportunities
Place to raise children
People similar to you
General place to live
Taxes
Public schools
Crime
Housing
Restaurants
Public services
Divorce rate
Friendliest people
Movies
Cultural facilities
Cost of living

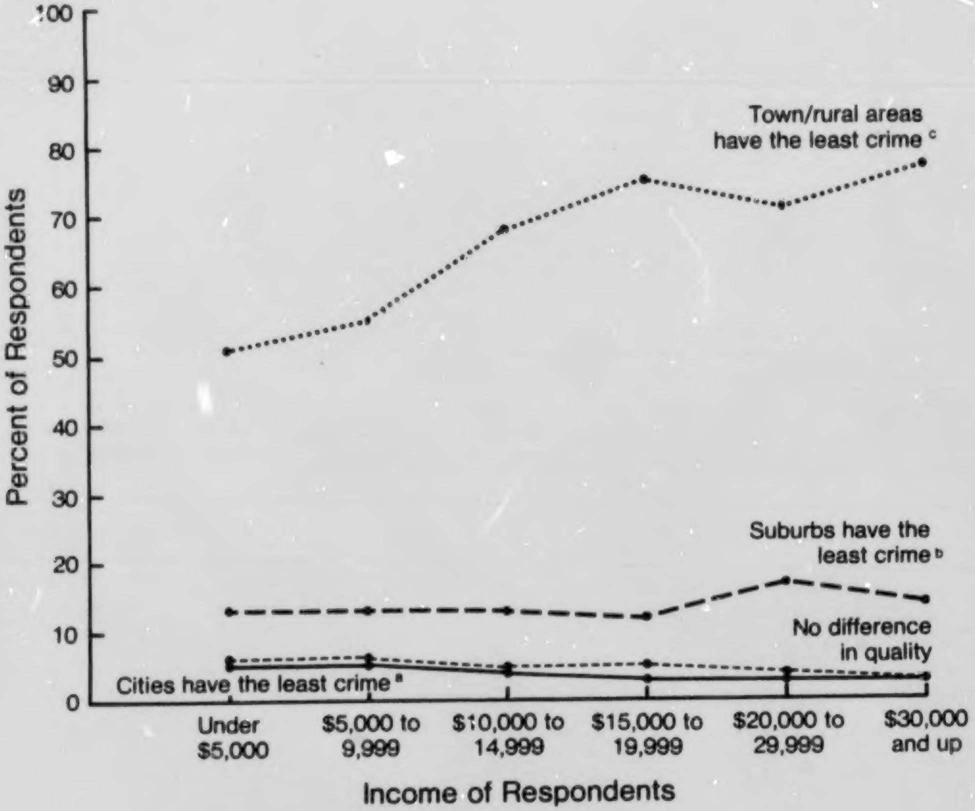
Some Highlights of the Data

- A majority of Americans believe that the nation's large cities have the worst housing, the worst public schools, the highest crime rate and the highest taxes, and that they are the worst places to raise children. On the other hand, majorities believe large cities to have the best selection of movies and restaurants; the best employment opportunities, health care facilities, shopping facilities and colleges and universities; and the most plays, museums and other cultural opportunities.
- The least crime, they believe, exists in small cities, towns, and rural areas.
- Nearly all Americans say that large cities offer the best assortment of plays, museums, and other cultural opportunities.

Graph A-6

Many People Say That Town and Rural Areas Are the Safest

Type of Place Seen as Having the Least Crime, by Income of Respondent



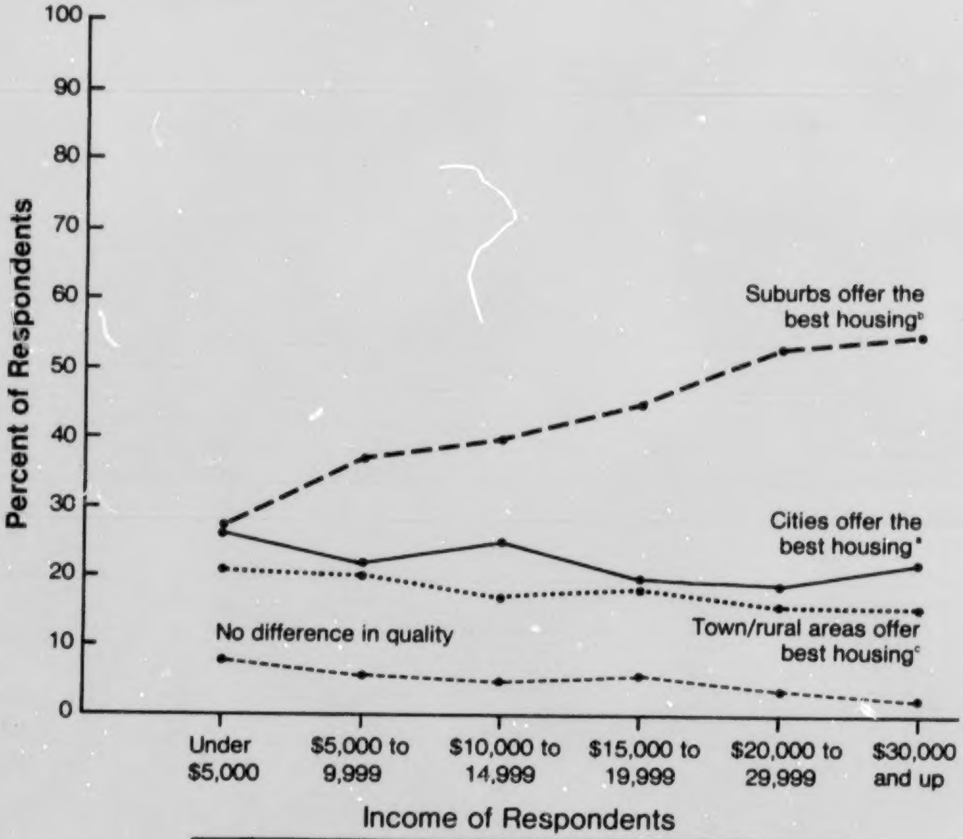
[a] Includes reference to large city or medium city not in the suburbs
[b] Includes reference to medium or small city in the suburbs
[c] Includes reference to small city not in suburbs and rural area

107

Graph A-7

Higher Income People Are More Likely to Say That the Suburbs Offer the Best Housing

Type of Place Seen as Having the Best Housing, by Income of Respondent



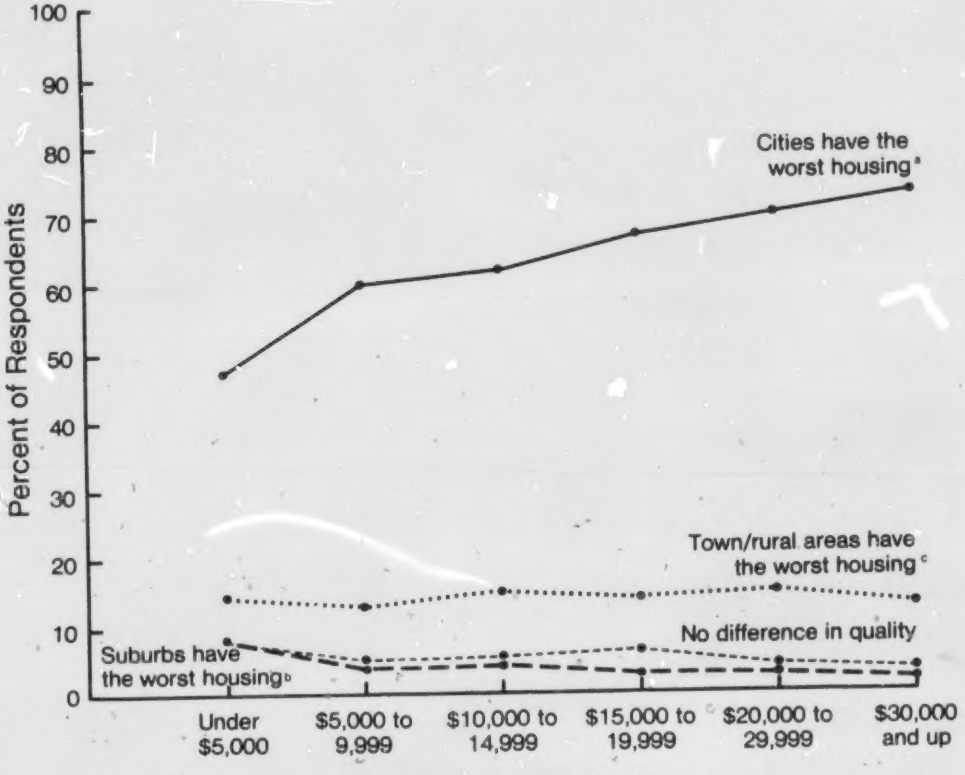
[a] Includes reference to large or medium city not in suburb

[b] Includes reference to medium of small city in suburb

[c] Includes reference to small city not in suburb or rural area

Where Is the Worst Housing?

Type of Place Seen as Having the Worst Housing, by Income of Respondent



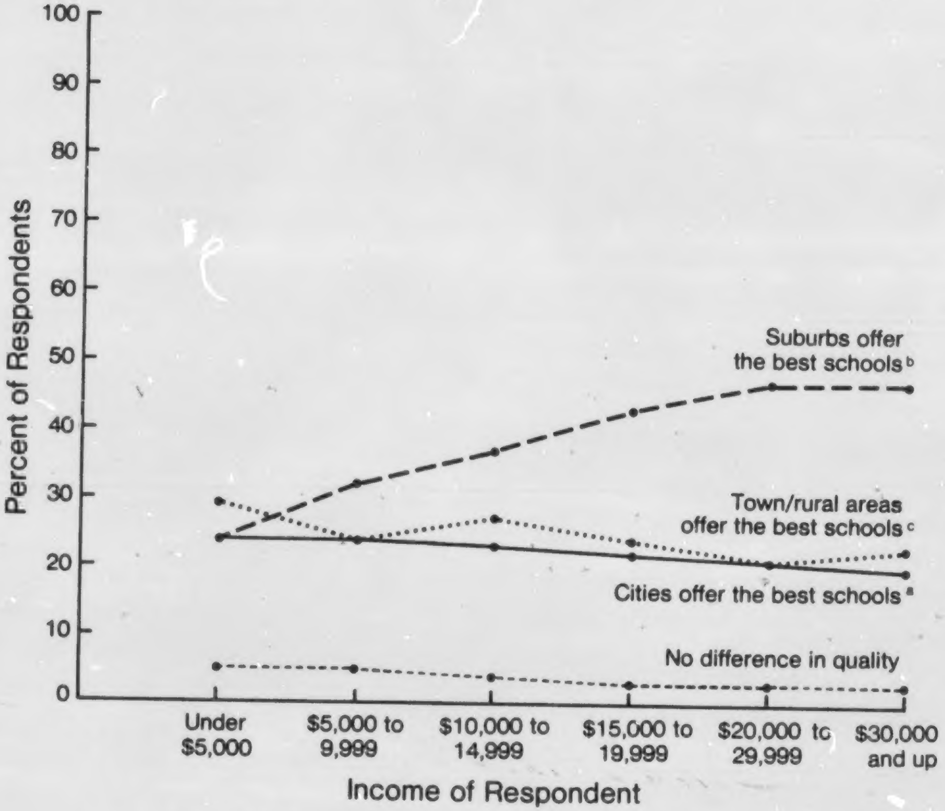
[a] Includes reference to large or medium city not in suburbs
[b] Includes reference to medium or small city in the suburbs
[c] Includes reference to small city not in suburbs or rural area

109

Graph A-9

Higher Income People Are More Likely to Say That the Best Schools Are in the Suburbs

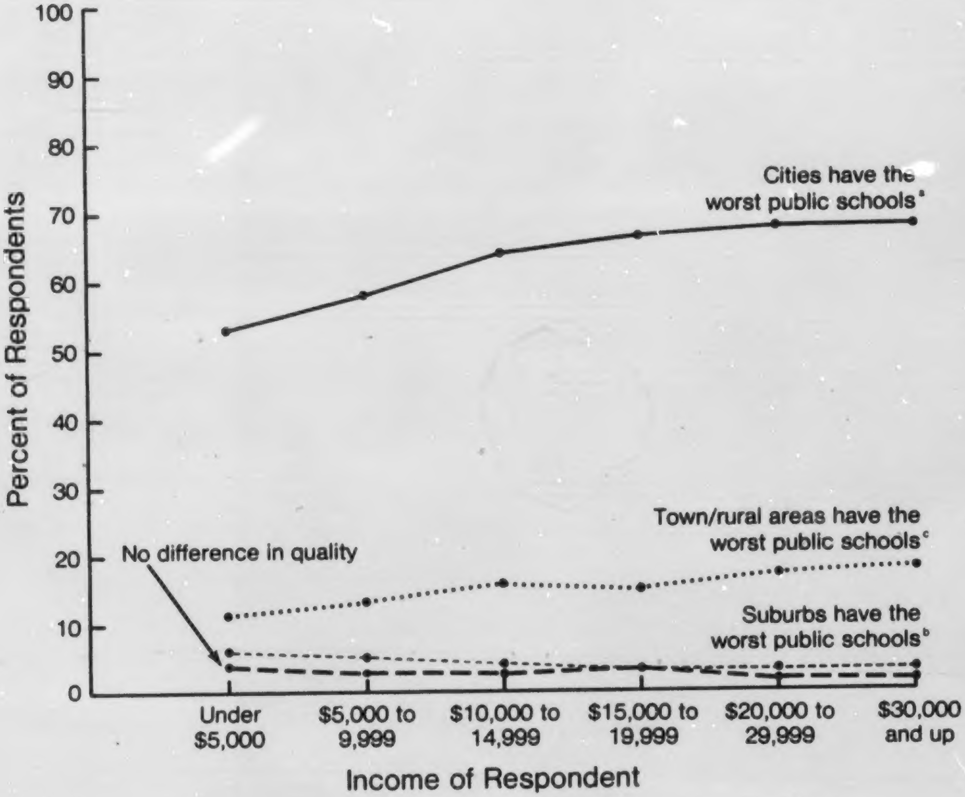
Type of Place Seen as Having the Best Public Schools, by Income of Respondent



[a] Includes reference to large or medium city not in the suburbs
[b] Includes reference to medium or small city in the suburbs
[c] Includes reference to small city not in suburbs or rural area

Where Are the Worst Schools?

Type of Place Seen as Having the Worst Public Schools, by Income of Respondent



[a] Includes reference to large or medium city not in the suburbs
[b] Includes reference to medium or small city in the suburbs
[c] Includes reference to small city not in suburbs or rural area

Have Cities Been Changing For The Better Or For The Worse?

People's perceptions about the advantages or disadvantages of life in the nation's large cities may, to some degree, reflect their own past experiences with cities or, at any rate, their recollections of these experiences. Recollections about one's formative years may not always be accurate; nevertheless, they sometimes serve as standards or benchmarks against which people judge contemporary experiences.

What do Americans believe life in the city to have been like when they were growing up? What do they think about large city life today? Comparing recollections of the past with current observations gives an indication of the change, if any, that is perceived to have taken place. What is the direction and extent of this change?

Question 31 asked respondents whether, when they were growing up, large cities (those over 250,000 in population) provided the following:

- — the best shopping
- — the best housing
- — the best restaurants, entertainment and cultural events
- — the best opportunities for advancement

They were also asked whether large cities are still doing so and, finally, whether cities have changed for the better or worse in these respects.

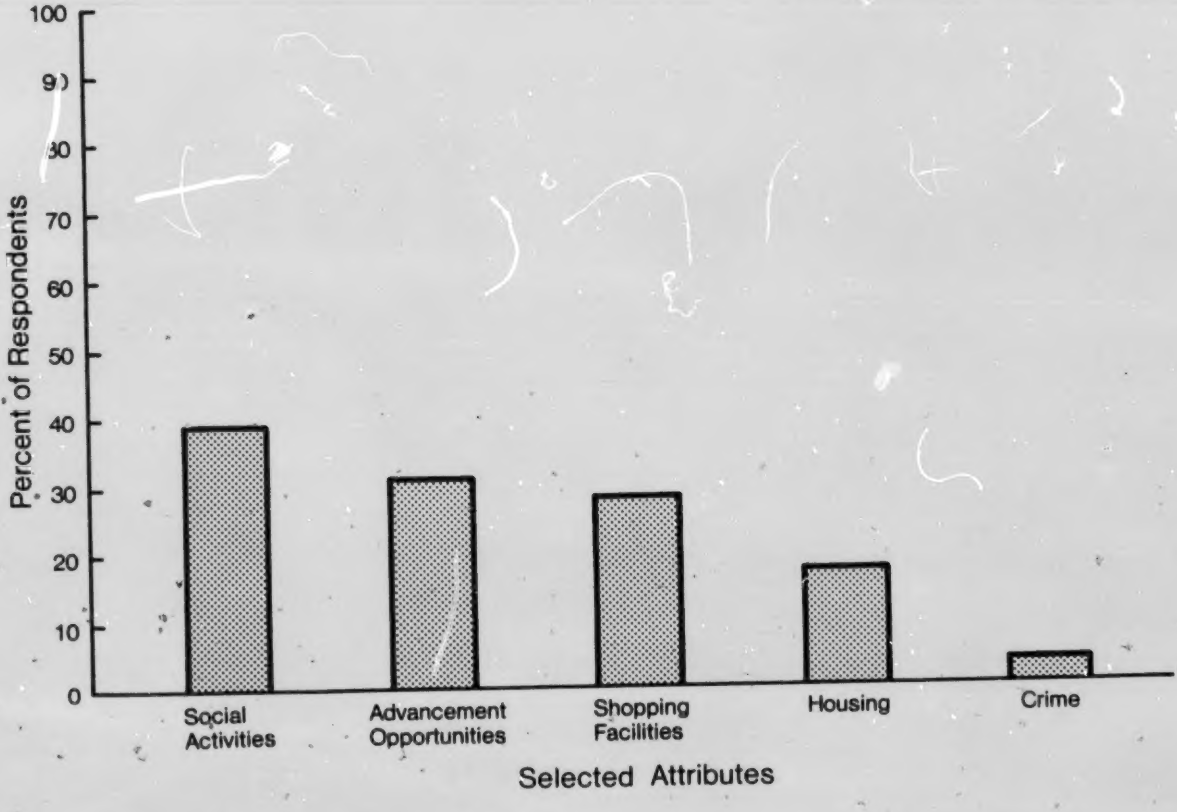
Respondents were also asked about the amount of crime that was to be found in large cities when they were growing up as compared to now.

Some Highlights of the Data

- Thinking about the years when they were growing up, most Americans agree that cities with a population of over 250,000 had the best shopping, the best restaurants, entertainment and cultural activities, and the best opportunities for advancement. Many, but somewhat fewer people, also say that large cities had the best housing and the least crime.
- Smaller numbers of Americans, but majorities nevertheless, say that large cities still have the best shopping, restaurants, entertainment, cultural activities, and opportunities for advancement. Most do not think, though, that large cities offer the best housing or have little crime.
- When asked to compare the present-day city with that of the past, most people say that, over the years, the crime and housing situations have changed for the worse; but just over half of all Americans think that restaurants, entertainment and cultural activities have changed for the better.

Americans Say That Over the Years Some Attributes of Large Cities Have Changed for the Better More Than Others

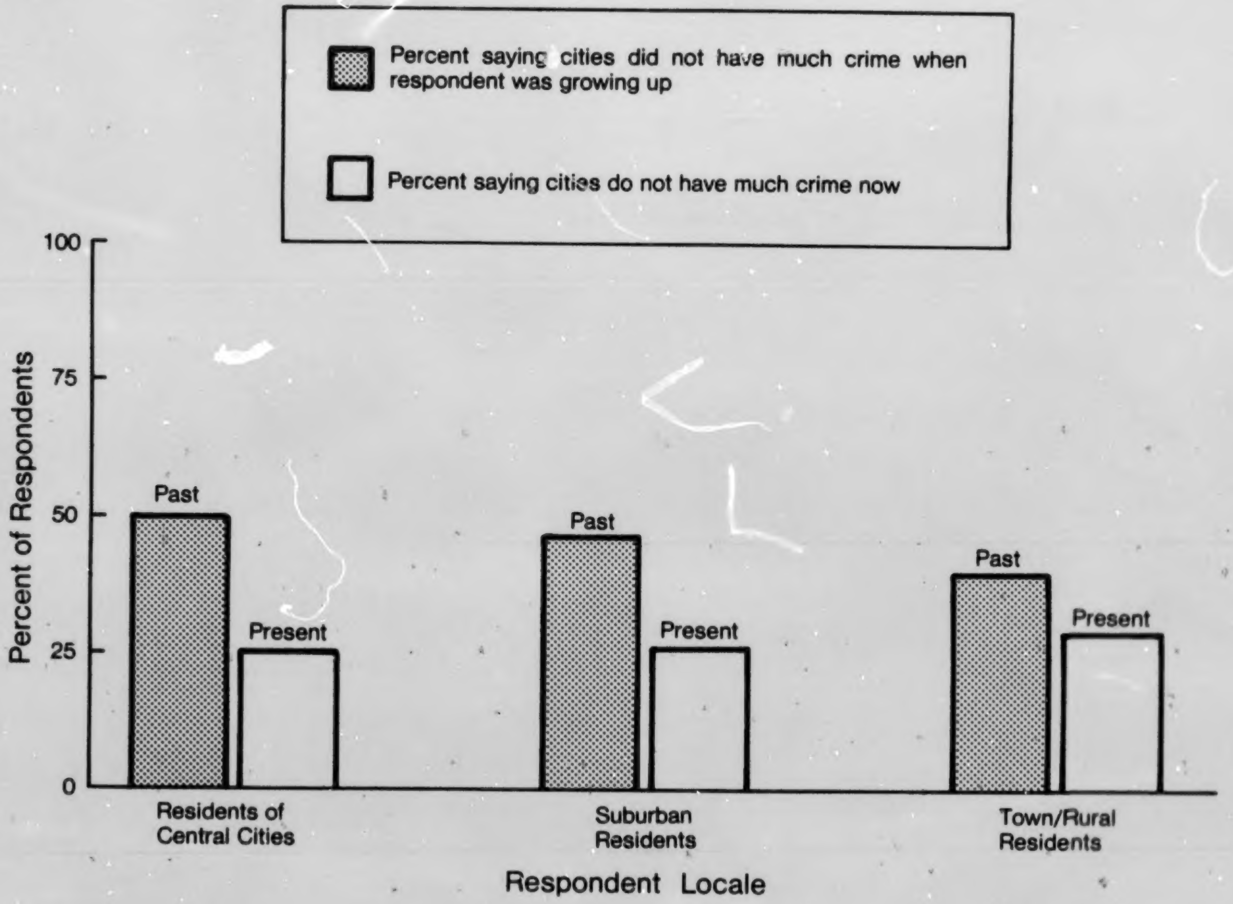
Percent of Total Sample Indicating That Selected Attributes of Large Cities Have Changed for the Better Over the Years



Graph A-12

Many People Say That Crime Is Worse in Large Cities Than It Used to Be

**Amount of Crime in Large Cities—
Past and Present, by Respondent Locale**



A Large Majority of People Say That Large Cities Offer the Best Entertainment

Quality of Restaurants, Entertainment, and Cultural Events in Large Cities— Past and Present, by Respondent Locale

Would America Be A Better Place Without Cities?

Although cities have played a crucial role in the development of American society, there have always been some people prepared to dismiss cities as irrelevant, worthless, or even wicked.

How much anti-city sentiment exists in the nation today? What types of people believe that America can exist nicely without its cities?

In Question 32, Americans were asked if this country would be a better place without cities; a worse place without cities; or if the presence of cities makes any difference at all.

Some Highlights of the Data

- Somewhat more than half (56%) of all Americans say that this country would be a worse place without its cities. Eleven percent believe that America would be better off without cities, 19 percent say that it wouldn't make much difference, and 14 percent aren't sure one way or the other.
- The belief that America would be worse off without its cities is more frequently expressed by family members whose heads of household have professional and managerial jobs. Also, people who hold this opinion more frequently live in suburbs and places which have low rates of unemployment and poverty, have college educations, and have fairly high incomes.
- Blacks, compared to whites and Hispanics, are less likely to say that America would be worse off without its cities.

The Majority of People Say America Would Be Worse Off Without Cities

Community Problems Facing Americans

What community problems are most troubling to Americans?

What Community Problems Are Most Troubling To Americans?

The number, kind and severity of problems facing any community, as judged by its own residents, are measures of the quality of life in that locale. From the perspective of public policy, these perceptions that problems exist give an indication of some of the more important developmental needs of a community.

The nature and extent of local problems tend to vary from place to place—for example, from one region of the country to another, from cities to suburbs to rural areas, and among neighborhoods. Further, conditions may be perceived differently by various groups within the same place. Older, lower income, or unemployed persons, for example, are likely to face problems that are both peculiar to their situation and are quite different from those felt by other community residents.

In Question 7. Americans were asked to indicate whether each of the following problems was severe, small, or not a problem at all in their community.

Crime
Lack of medical care
Traffic congestion
Dirty streets and sidewalks
Unemployment
Lack of interesting things to do
Too many fires
Air pollution
Drug addiction
Noise level
Lack of parks
Teen-age gangs
Lack of childcare facilities

Some Highlights of the Data

- Americans say that crime, unemployment, drug addiction, and housing conditions are among the most frequently occurring community problems in the places where they live.
- Except for "lack of interesting things to do" and lack of parks, each of the problems listed above is rated as severe by more city residents than by people who live in suburbs, small towns and rural areas.
- The perceived severity of problems tends to vary across groups. For example, 29 percent of whites compared to 69 percent of blacks identify crime as a severe community problem.
- More residents of larger cities and of cities whose populations have declined in recent years are troubled by economic, social and physical problems than are residents of other places.

The Sociology of American Neighborhoods

How often do neighbors get together?

What kinds of people do Americans prefer to have as neighbors?

Do Americans prefer to live in integrated or segregated neighborhoods?

How Often Do Neighbors Get Together?

The quality of life in any locality is likely to be affected by the amount of social interaction that occurs among its residents. In some places, neighbors get together frequently with one another and establish a close relationship. In other places, neighbors generally keep to themselves.

How much social interaction exists among neighbors in America today? Does neighborhood interaction occur more frequently in certain kinds of places — such as rural or suburban areas — than in others — such as large cities? Which kinds of people are more likely to live in relative isolation from their neighbors?

Question 8 asked Americans if, in general, people in their neighborhoods keep pretty much to themselves or if they get together quite a bit.

Some Highlights of the Data

- Over half (57%) of all Americans say that their neighbors generally keep pretty much to themselves rather than get together quite a bit. In large cities, even more neighbors keep to themselves (72%) than in suburbs (55%) or in rural areas (44%).
- People who live in predominantly minority neighborhoods and in communities where the population has been declining report that their neighbors keep to themselves more often than those who live in predominantly white neighborhoods or communities where the population has been increasing.
- People who say their neighbors get together frequently are most likely to have college educations, professional jobs, and relatively high incomes.
- Divorced or separated persons rather than people who are single, widowed, or married are more likely to say their neighbors keep to themselves.

Graph C-1

More Residents of Central Cities Say That Their Neighbors Keep to Themselves Than Say Residents of Other Places

Perceived Social Interaction in Respondent Neighborhood, by Respondent Locale

What Kind Of People Do Americans Prefer To Have As Neighbors?

America is an extremely heterogenous nation, consisting of people who have a wide range of different backgrounds, interests, beliefs and attitudes. In contrast to this broad social diversity, many residential neighborhoods are composed of people with common characteristics like religion or income levels.

What kinds of neighborhoods do people prefer to live in? Do they want an environment in which most of the other residents are similar to themselves, different from themselves, or are a mixture of various interests and attitudes as well as of various social, racial, economic, ethnic and religious groups?

Question 9 asked Americans whether they preferred to live in neighborhoods in which most people are the same as them, different from them, or in which some are the same and some are different in the following regards:

- Level of Education
- Income
- Age
- Race
- Religion
- Ethnic background/nationality
- Political attitudes
- Leisure-time interests

Some Highlights of the Data

- Americans are more likely to prefer living in neighborhoods where the residents have varied incomes, levels of education, political attitudes, and religious affiliations and are of different age groups and ethnic origins than they are to prefer neighborhoods where other people are similar to themselves in these regards.
- Persons in families whose heads of households are in farm-related occupations are somewhat more likely to prefer having neighbors who are similar to themselves in a variety of social and cultural respects. A larger proportion of persons in families whose heads of households are in professional occupations prefer to have neighbors with diversified backgrounds.
- The higher one's level of education, the more likely one is to prefer neighborhoods which have a mixture of different types of persons.
- Americans state a preference for racially homogeneous neighborhoods (31% of the time) more often than they do for homogeneity in any of the other regards.

Do Americans Prefer To Live In Integrated or Segregated Neighborhoods?

Eliminating racial discrimination and promoting equal opportunities in housing are major national goals. One measure of the extent to which these goals have been achieved is the proportion of the population which is currently living in segregated neighborhoods. But a neighborhood can become segregated for many reasons, not the least of which are the attitudes of its residents. Therefore, people's preferences for residential integration or segregation are also important indicators of the potential for achieving these goals.

As of 1978, what proportion of the population lives in neighborhoods that they would describe as racially integrated or racially segregated? Regardless of the racial composition of their present neighborhoods, do Americans prefer to live in places that are integrated or segregated? What are the characteristics of people who prefer integration and of those who prefer segregation?

Questions 1(a) and (b) asked Americans to describe the racial composition of their immediate neighborhood, using the following categories:

- — All white
- — Mostly white
- — About half white and half minority
- — Mostly minority
- — All minority

They were tnen asked to indicate the kind of neighborhood that they prefer, using the same five categories.

Some Highlights of the Data

- Nine of every ten white Americans say that they live in predominantly white neighborhoods; about 8 percent live in neighborhoods which they identify as half white, half minority.
- A majority of the people who live in either all white, predominantly white, or half white and half minority neighborhoods say they prefer the kind of neighborhood in which they now reside. A plurality (45%) of those who live in mostly minority neighborhoods perfer a location more evenly divided between whites and minorities. Of those who live in all minority neighborhoods, 40 percent prefer to live in such places and 33 percent prefer a location which is half white and half minority.

Graph C-3

Do Americans Prefer Racially Mixed Neighborhoods?

Comparison Between Respondents Who Perceive Their Neighborhoods to Have an Approximately Equal Mix of Blacks and Whites and Respondents Who Prefer an Equal Mix of Blacks and Whites, by Selected Characteristics

How Americans Use Their Cities And Suburbs

Where do people spend their time — in the cities or elsewhere?

Where do people work and how do they get there?

Where Do People Spend Their Time — In The Cities Or Elsewhere?

Continuing developments in transportation, entertainment and service facilities have increased the likelihood that Americans will travel some distance from their place of residence to engage in various activities. Improved transportation facilities, particularly the highway system, have shortened the time it takes to travel from place to place. The growth of new office buildings, shopping centers, restaurants, theaters and sports arenas throughout the metropolitan area has encouraged people to travel both within their own community as well as to nearby places to take advantage of these facilities.

Have these developments affected community utilization patterns? How often do Americans venture outside of their own community to use the facilities or participate in activities in another jurisdiction? Overall, is there more usage of city facilities by residents of the suburbs than there is of suburban facilities by residents of the cities?

Questions 34(a) and (b) asked Americans how often— almost every day, once or twice a week, a couple of times a month, once a month, a few times a year, once a year, less often than that, or never — they engaged in the following activities within their own community:

- Go to a movie
- Go to a museum, play or concert
- Buy furniture or a major appliance
- Buy some new clothes
- Go out and have a nice dinner
- Attend religious services
- Go to see a live sports event
- Visit friends
- Go to a doctor

They were then asked to indicate how often they engaged in these activities outside of their own community.

Some Highlights of the Data

- From four to six of every ten central city, small town and rural residents never go outside of their locale to engage in most of the activities listed above.
- City residents more frequently make use of the city than they do of other parts of the metropolitan area. People who live outside of an SMSA make frequent use of places other than the central city more than they do of the central city.
- However, jurisdictional boundaries between central cities and their surrounding areas are often crossed. For example, 40 percent of suburbanites say they go out to have a nice dinner in the city at least once a month and 18 percent of all city residents go out to dinner outside of the city.

Where Do People Work And How Do They Get There?

Employment opportunities are not always concentrated in a single, central location but are often located throughout a metropolitan area. They are found in the exurbs and suburbs as well as in the cities. Since people are frequently employed outside of the community in which they live, they, as well as many others who live and work in the same community, must commute to work.

How many Americans leave their own community to work elsewhere and what is the balance between suburban residents working in the city and city residents working in the suburbs? What means of travel do people rely on to get to and from work? How long a commute do Americans generally have?

Questions 35(e), and 35(b) and 35(d) all deal with commuting patterns. The first question asked Americans about the means of transportation that the head of the household (as designated by the survey respondent) relies on to go to and from work.

The second question asked about where this person works.

The third question asked how long it generally takes to get from one's place of residence to the work place.

Some Highlights of the Data

- Of those heads of household who travel to work, 77 percent use a private car.
- Among employed heads of household, about as many work in the suburbs as work in cities. Central city residents are more likely to have jobs in the city, but suburbanites are as likely to have a job in the suburbs as in the city.
- There is, however, a crossflow of urban heads of household who work in nearby suburbs (17%) and suburban residents wo work in the nearest large city (33%).
- For more than half of the heads of household who are employed outside of their home (54%), the daily commuting time to work is less than twenty minutes, but an even larger proportion (68%) of small town and rural residents commute to work in less than twenty minutes.
- In general, black Americans spend more time commuting to work than do white Americans.

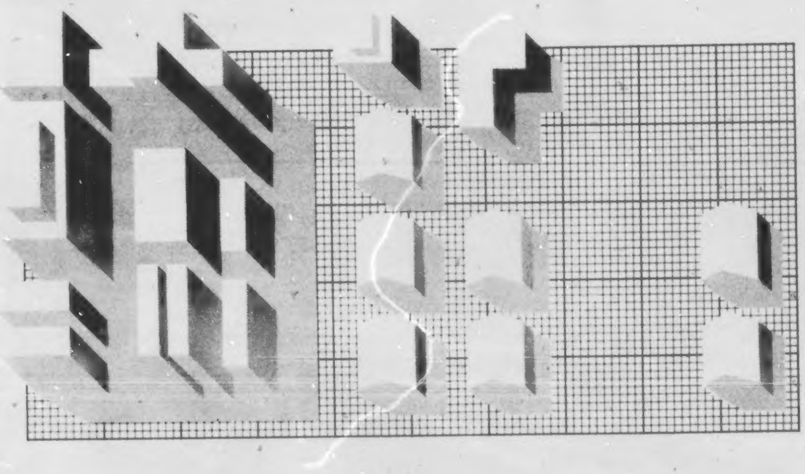
Section E



The Performance of Government

How good are local public services?

Is the government responsive to the people?

Who should pay for public services and who should run them?

How efficient or wasteful is the government?

How Good Are Local Government Services?

Most units of local government, either directly or through quasi-independent authorities, provide basic public services to their residents. These include street lighting and maintenance, police and fire protection, public transportation, health services, garbage collection, public schools, parks and playgrounds. The public's evaluation of how well these services are being provided, if at all, in their neighborhood is an indication both of the quality of life in that particular place as well as a measure of citizen satisfaction with local government. From a public policy perspective, public service evaluations and suggestions for improvement provide a basis for assessing citizen priorities and concerns.

How satisfied are Americans with the public services provided to their neighborhoods? Does the level of satisfaction vary from one type of place to another and from group to group?

Question 6 asked Americans to assess the following public services provided to their neighborhood, using a rating scale ranging from "excellent" and "pretty good" to "only fair" and "poor" or to indicate if the service was not available:

- — Fire protection
- — Garbage collection
- — Street lighting
- — Police protection
- — Public schools
- — Parks and playgrounds
- — Road and street maintenance
- — Public transportation
- — Public health services in hospitals and clinics

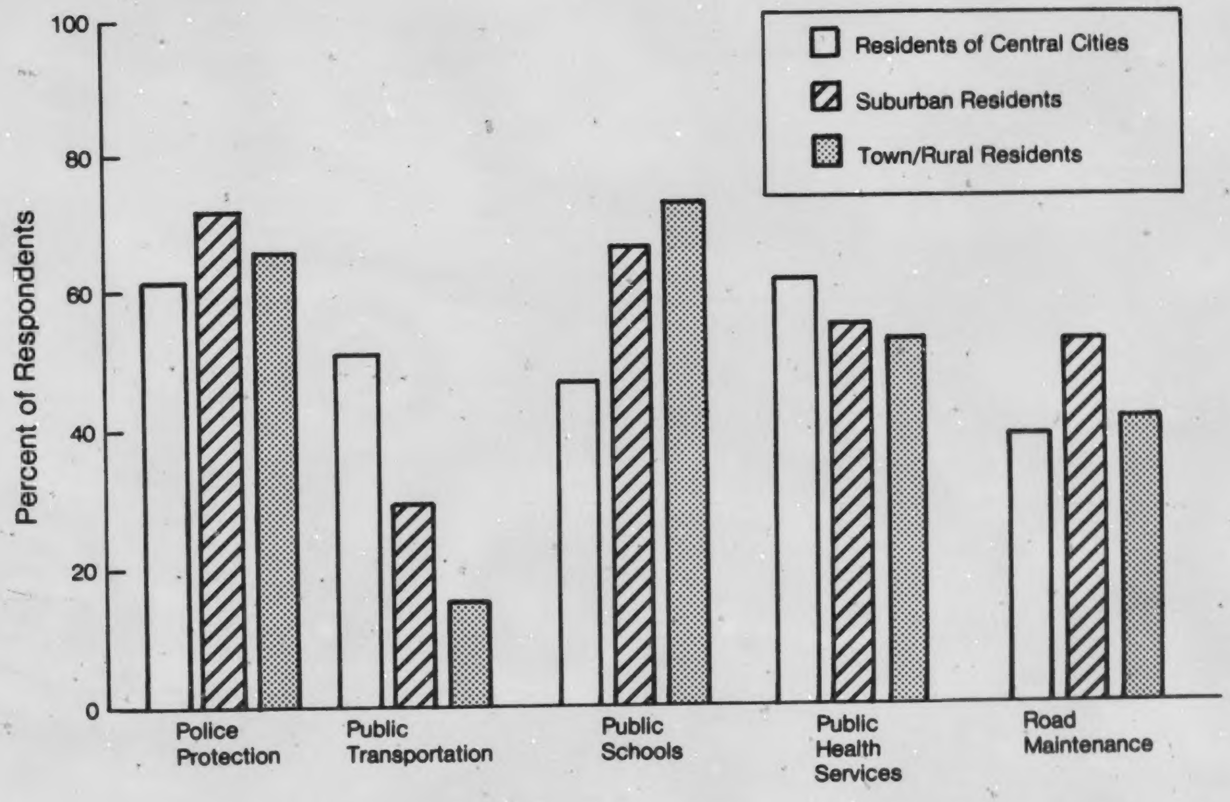
They were also asked which of these public services they would most like to see improved or made available in the next few years.

Some Highlights of the Data

- Over half of all Americans say that the quality of most public services in their communities is either "excellent" or "pretty good." Ratings of road maintenance and public transportation — the latter frequently unavailable — were not as high.
- More residents of central cities than of other areas give public transportation a good rating. More people who live in suburban and rural places than city dwellers give their public schools good ratings.

How Highly Do We Rate Our Public Services?

Percent of Respondents Rating Each Public Service as "Excellent" or "Pretty Good" in Their Community, by Respondent Locale

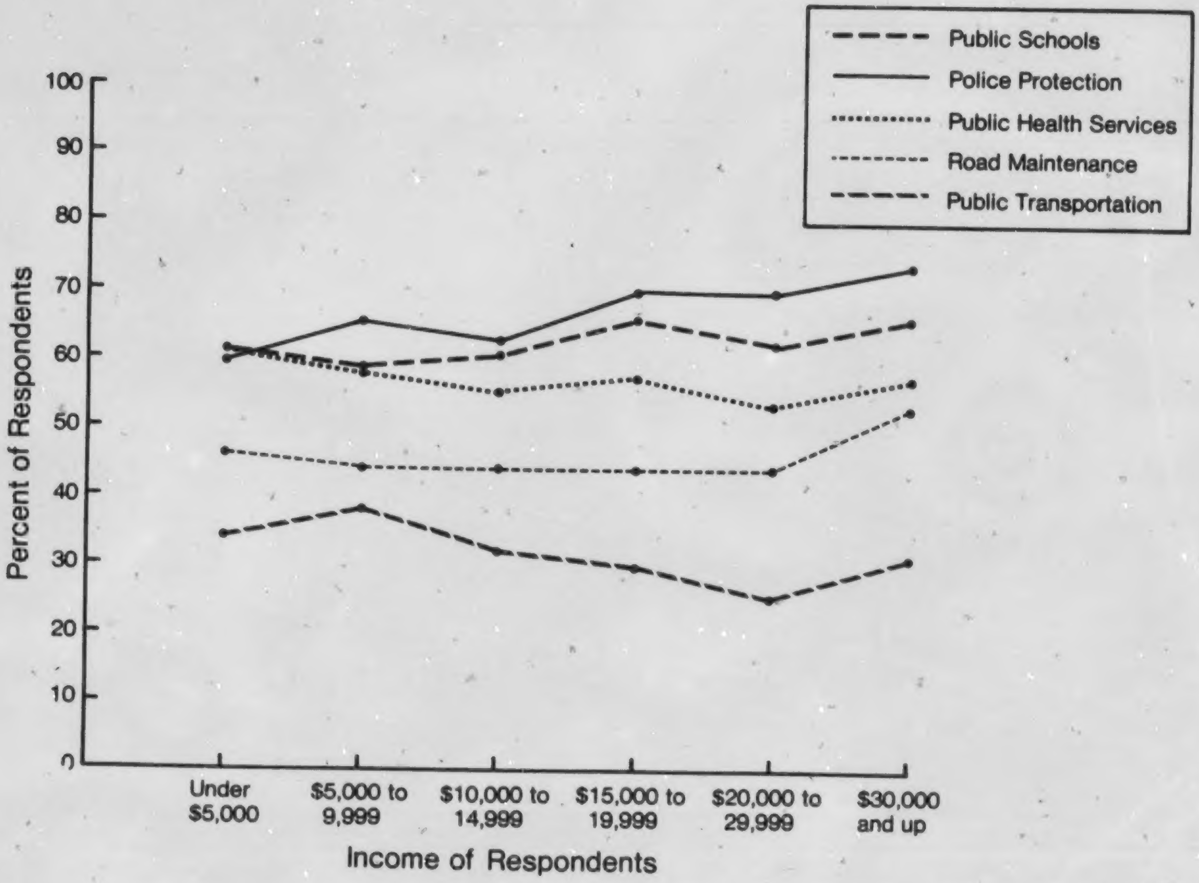


729

Graph E-2

Higher Income Persons Rate Police Protection and Public Schools More Positively Than Lower Income Persons

Percent of Respondents Rating Police Protection and Public Schools as "Excellent" or "Pretty Good" in Their Community, by Income of Respondent



Which Public Services Do Americans Say Need Improvement?

Percent of Respondents Feeling Improvement Is Needed for Selected Public Services, by Respondent Locale

Is the Government Responsive to the People?

Public perceptions of the responsiveness of government to their needs and concerns is a good barometer of both government performance and of the public's sense of well-being. A belief that any or all levels of government are unresponsive can result in increased public cynicism about Democratic institutions as well as affect the kind and intensity of citizen participation in the political process.

Do Americans believe that their local, state and Federal governments are adequately responding to the major problems of their community? Which levels of government are believed to be most responsive and which to be least responsive? What kinds of people are least happy with the performance of their government?

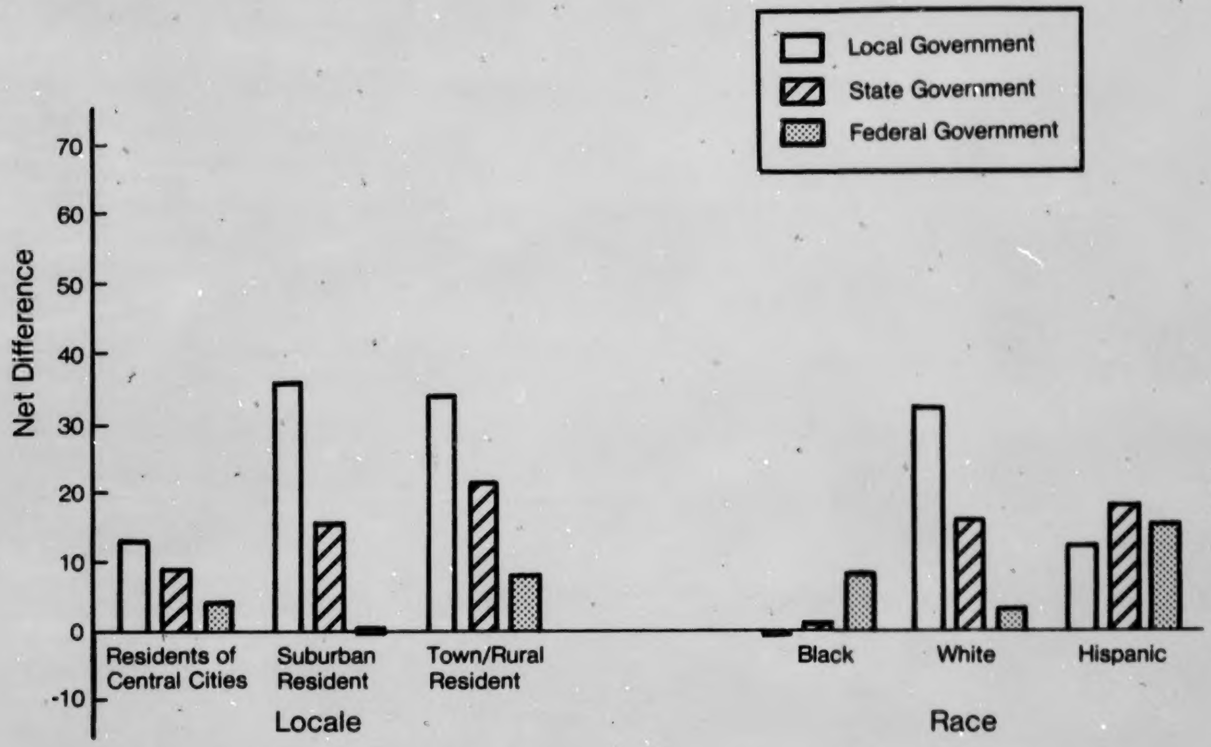
In Question 11(a), respondents were asked how responsive—very, somewhat, only slightly, or not at all—they felt their local, state and Federal governments were to the major concerns of the people in their community.

Some Highlights of the Data

- Fewer Americans (45%) say the Federal government is responsive to the concerns of their communities as say their local government (59%) is responsive. About half (51%) of the public believe state government to be responsive.
- Local government is considered responsive by more residents of smaller cities and cities whose populations are increasing than by residents of larger cities and cities whose populations are declining.
- More minorities — particularly blacks — than whites say that local government is "only slightly" or "'not at all" responsive.
- Younger people are more likely than older people to see all levels of government as unresponsive.

Americans Generally View Local Government as More Responsive Than State or Federal Government

Net Difference in Citizens' Perceptions of Government Responsiveness by Respondent Locale and Race*



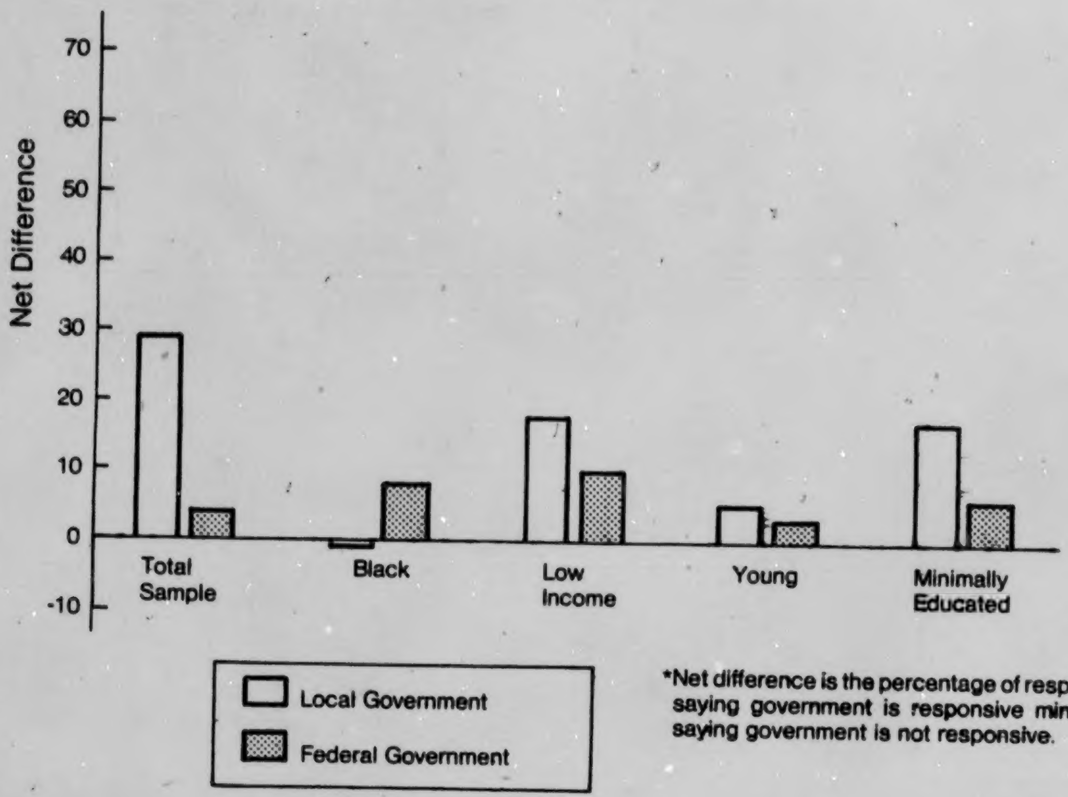
*Net difference is the percentage of respondents saying government is responsive minus those saying government is not responsive.

793

Graph E-5

Do Americans View Government as Responsive?

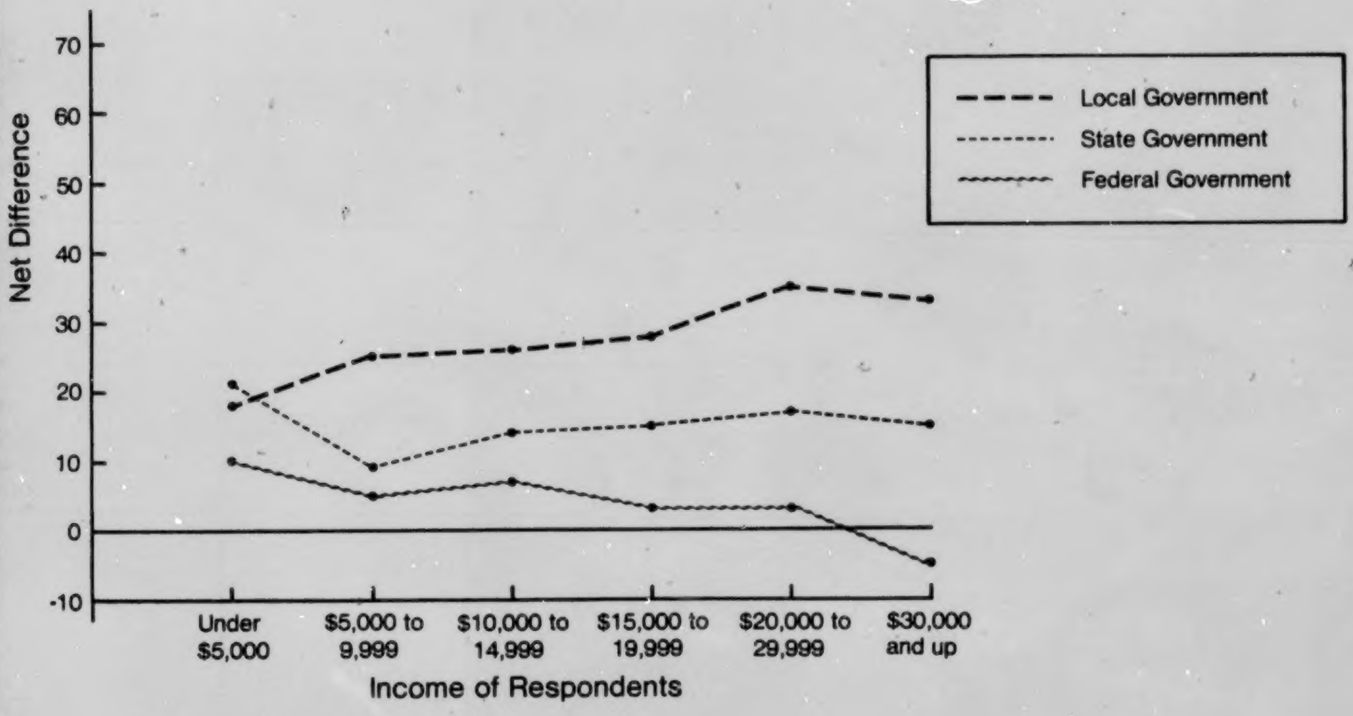
Net Difference in Evaluation of Government Responsiveness, by Selected Groups of Respondents*



*Net difference is the percentage of respondents saying government is responsive minus those saying government is not responsive.

Americans View Local Government as More Responsive Than State or Federal Governments—This View Is More Frequent as Income Increases

Net Difference In Government Responsiveness, by Income of Respondents*



*Net difference is the percentage of respondents saying government is responsive minus those saying government is not responsive.

795

Who Should Pay for Public Services and Who Should Run Them?

In our federal system of government, public policies are made and programs are run by many different governmental entities, from the local level (village, town, city, county) to the state and Federal levels. One level of government may be better able or more suited than another to fund and to administer programs; sometimes, administration and funding should be shared among the levels; and, sometimes, one level should fund and another level should administer public services. Alternatively, there may be programs in which no level of government ought to be involved. What are the public's preferences on this subject?

Which level(s) of government, if any, do Americans believe should pay for services like public transportation, health-related programs, libraries, urban revitalization programs, and environmental quality monitoring? Do people prefer to have one level of government fund these services but to have another level operate and manage them?

In question 28, respondents were asked which level of government — local, state, Federal or no level — should be responsible for paying for the following:

- — Public transportation
- — Air and water quality control
- — Law enforcement
- — Employment and job training
- — Social services for the elderly
- — Public education
- — Health services
- — Housing assistance to the poor
- — Improvement of run-down cities
- — Cultural facilities, libraries, concerts and museums

They were then asked which level of government, if any, should be responsible for running them.

Some Highlights of the Data

- A plurality of Americans believe that local government should be responsible for "running" seven of the ten services listed above. For a smaller number of the services, there are also clear majorities who favor local government administering these services.
- However, Americans are less committed to local government "paying" for all these services. Only in the case of law enforcement does a majority specify that local government should pay; in four other cases there is a plurality in favor of local funding. More people say that the Federal government, as opposed to the other levels, should pay for social services for the elderly and housing assistance for the poor. A plurality believes that state governments should fund education.

Which Level of Government Should Pay for and Run Public Services?

Percent of Respondents Saying What Level of Government Should Pay for and Run Selected Public Services, by Total Sample

How Efficient or Wasteful Is the Government?

Support has been growing in recent years for reducing the tax revenues that are used to pay for public services. Those who argue for tax reduction generally premise their position on the belief that government, at all levels, is wasteful and inefficient.

What proportion of Americans hold the view that their government wastes the taxpayers' dollars? Which level of government — local, state or Federal — is judged to be the least efficient? Which groups of people — such as upper, middle or lower income; older or younger; home owner or renter — are most likely to view the government as wasteful?

Questions 11(b) and 29 deal with government waste and efficiency. The first asked Americans whether they believe the following levels of government to be "very wasteful," "somewhat wasteful," "slightly wasteful," or "not wasteful at all:"

- Their local government
- Their state government
- The federal government

The second question asked which of these levels of government gave them the most for their tax dollars.

Some Highlights of the Data

- Most Americans think that government at all levels is either very or somewhat wasteful. The level perceived as wasteful by the largest proportion of the public (75%) is the Federal government. State government is seen as wasteful by 67 percent and local government by 55 percent of the people.
- Residents of central cities are more likely to think that their local governments are wasteful than suburban and small town/rural residents think their governments are wasteful.
- Homeowners (as compared to renters) and college graduates (as compared to people with less education) appear to be somewhat less critical of waste in local government and somewhat more critical of waste in the Federal government.
- While there is little variation in the level of criticism of state and local government among race and ethnic groups, whites are more likely than blacks and Hispanics to criticize waste in the Federal government.

Note: Tables for Question 29 Appear on Pages 456-463.

The Residential and Housing Preferences of Americans

Where do Americans want to live?

Where do parents want their children to live when grown up?

Why did people choose their current place of residence?

What kinds of housing do people prefer?

Where Do Americans Want to Live?

People choose their place of residence for many different reasons, not all of which are consistent with their ultimate preferences. For example, there are those who would prefer to live in a particular setting but do not do so because they cannot afford it or because that place is too far from their work location.

In what kinds of places would Americans ideally like to live? Who prefers large cities and who prefers more rural settings? What proportion of Americans are currently living in their preferred place of residence and what proportion would rather be elsewhere?

Question 1(g) asked Americans what would be their very first choice if they could live anywhere they wanted to. Would they prefer:

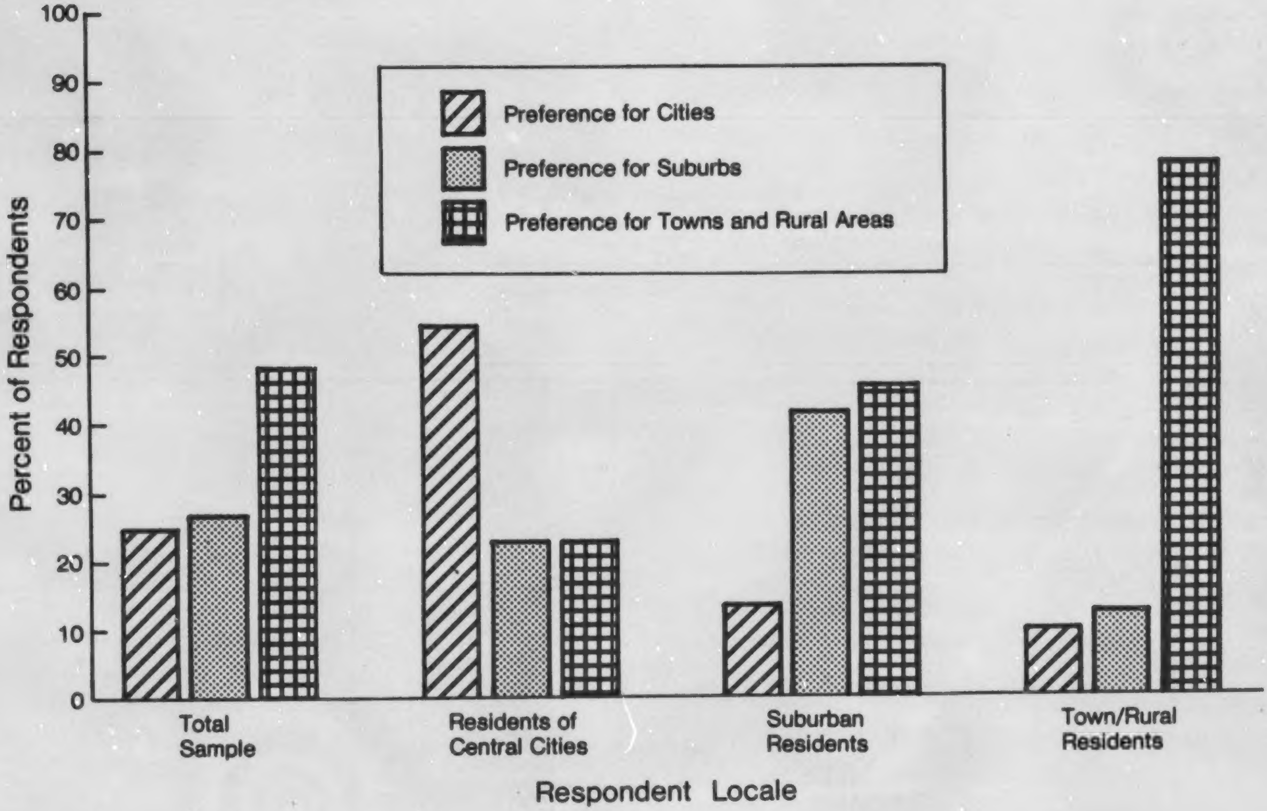
- A large city
- A medium-sized city in the suburbs
- A medium-sized city not in the suburbs
- A small city, town or village in the suburbs
- A small city, town or village not in the suburbs
- A rural area

Some Highlights of the Data

- Almost half (47%) of all Americans express a preference for living in a rural area or in a small city, town or village which is not in the suburbs. Eight percent prefer a medium sized city (50,000 - 250,000) which is not in the suburbs. Small or medium sized cities in the suburbs are the preferred locations of 27 percent of all Americans, and 16 percent prefer a large city.
- While a plurality (40%) of the residents of central cities prefer to live in a large city, 22 percent prefer a small city, town, or village outside of the suburbs or a rural area. In contrast, 78 percent of the people who live outside of SMSAs prefer a non-suburban small city, town or village or a rural area and only 4 percent would rather live in a city.
- A greater percentage of Blacks (38%) and Hispanics (32%) than whites (13%) indicate that their first choice of residence is a central city.
- Large cities are more frequently preferred by single persons and those who are separated or divorced than by married or widowed persons.

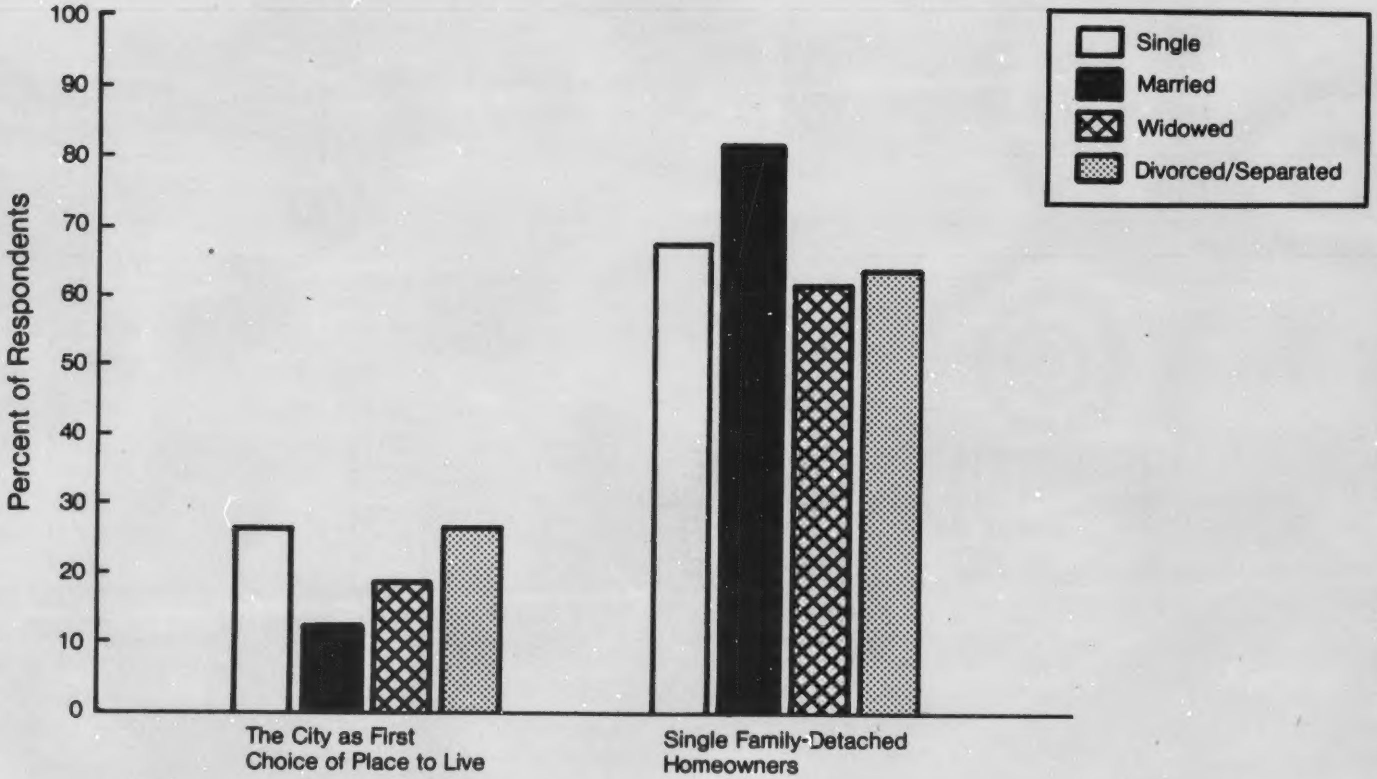
Where Do Americans Want to Live?

Residential Preferences for Types of Communities, by Respondent Locale



Are Housing and Locational Preferences Associated With Marital Status?

Percent of Respondents Indicating the City as First Choice of Place to Live and Percent of Respondents Owning Single-Family Detached Homes, by Marital Status of Respondent



99[illegible]

Where Do People Want to Live?

Ideal Locational Preference, by Racial Composition of Current Neighborhood

Where Do Parents Want Their Children to Live When Grown Up?

Although people are not always able to live in their ideal location, their preferences for where their children should live when grown up can be revealing. These preferences may be an indication of how satisfied the parents are with their present locale as well as provide insight into their own personal desires and aspirations.

Do parents want their children to live in a community similar to their current place of residence or would they prefer another type of place? Which places have the most appeal? Which kinds of people believe that their children should live in a community which is different from their own?

Questions 33(d) and (f) deal with parental attitudes about the best kind of location for their children. The first asked Americans if they would prefer to see their children when grown up and have their own families, live in a community like their own or in some other place.

Among those who preferred that their children live elsewhere, they were asked where they would want them to live, in a :

— Large city
— Medium-sized city in the suburbs
— Medium-sized city not in the suburbs
— Small city, town or village in the suburbs
— Small city, town or village not in the suburbs
— Rural area

Some Highlights of the Data

- Almost two-thirds of Americans who have children under the age of 21 want their children, when grown and have their own families, to live in a community similar to the one in which they now reside.
- People who live in communities with low levels of poverty and unemployment are more likely to prefer a similar community for their children than those who live in places with higher levels of poverty and unemployment.
- Those who live in predominantly or all minority neighborhoods are more likely to want their children to live elsewhere than are those who live in predominantly or all white neighborhoods.
- Fewer residents of central cities want their children to live in a similar kind of community than do residents of places outside of central cities.
- Those who say that their children should live in another kind of place — different from their current community — prefer rural areas (28%) more than any other type of place.

What Kind of Community Is Best for Our Children?

Preferred Place of Residence for Respondents' Children, by Respondent Locale

Why Did People Choose Their Place of Residence?

There are many circumstances and factors which can influence an individual's choice of residence. Sometimes, these relate to personal preferences and other times they are a function of convenience, necessity or availability. By acquiring a more extensive understanding of these factors, we will be in a better position to comprehend the complex process of neighborhood and community change. It can be argued, for example, that for localities to remain or become viable living environments, they must possess those attributes which attract people to them and which provide residents with the appropriate combination of amenities and satisfactions.

What are the most important factors which affect people's choice of a residential location? Do different groups of people have different priorities?

Question 3(a) asked respondents to indicate if the following reasons were very important or not too important in affecting their decisions to move to their present location, or if these reasons did not affect their decision.

- Convenient to work
- Housing was affordable
- Housing was type or quality desired
- Near relatives or friends
- Green open space
- Convenient shopping
- Recreation, entertainment and cultural facilities
- Safe neighborhood
- Good schools
- Good mass transportation
- Reasonable taxes
- Ethnic/racial composition
- Well-kept neighborhood

They were then asked to rank these reasons in order of importance.

Some Highlights of the Data

- Among possible reasons for moving, the highest proportion of Americans — 71 percent — indicated that affordable housing was "very important" or "important" in selecting their current home. The type of housing available and the safety of the neighborhood were also significant factors — 67 percent in both cases. The least significant factor — only 18 percent rated it similarly — was good mass transportation.
- When ranked, the single most important reasons for Americans selecting their current homes were job related factors — either convenience to work or a job change — and housing related factors — either the cost of housing or the quality of housing.

What Kinds of Housing Do People Prefer?

As housing costs continue to increase and as social conditions and life styles continue to change, the public's preferences for different types of housing may also begin to change. For some groups in the population — such as young, childless couples or the elderly — the traditional American preference for a single-family detached house may not be as appropriate as for others.

What are the housing preferences of Americans, in general, and of particular groups? Are there differences between the type of housing in which people grew up, the type that they currently have, the housing they are likely to have next, and their basic housing preferences?

In Question 20, respondents were asked to indicate in what type of dwelling they presently live:

- Single-family detached - own
- Single-family detached - rent
- Single-family attached - own
- Single-family attached - rent
- Two-family house - own
- Two-family house - rent
- Apartment - low-rise - own
- Apartment - low-rise - rent
- Apartment - high-rise - own
- Apartment - high-rise - rent
- Mobile Home
- Other

They were then asked which of these types of dwellings best represents their last home, best represents the type of home they lived in when they were 13 or 14 years old, and best represents the type of home that the are likely to live in next. Finally, they were asked to rank these types of dwellings in order of preference for their next home.

Some Highlights of the Data

- Six of every ten Americans indicate that their present dwelling is a single family detached house that they or someone in their family owns. Three-fourths of all Americans prefer to own a single family detached home.
- There are fewer single family homeowners in the North Eastern region of the nation than in other regions, and fewer in central cities than in places outside of central cities.
- Ten percent of the population prefers to live in a low or high rise apartment. Apartments are preferred by the elderly (18%) more than other age groups; by single persons (17%), those who are widowed (23%), divorced or separated (16%) more than married persons (5%); and by those with no children living at home (15%) more than families with children in the household.

Houses or Apartments— Where Do Americans Live?

Percent of Respondents Owning Single-Family Homes or Renting Apartments, by Respondent Locale and Race

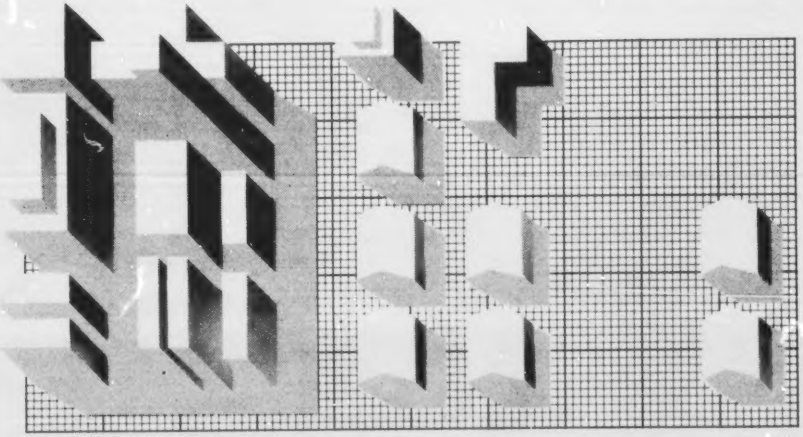
Section G



Changing Community Trends and Their Impact on Residential Preferences

Are local conditions changing for the better or worse?

What might cause people to change their place of residence?

How many Americans plan to move in the near future?

Are Local Conditions Changing for the Better or Worse?

People generally have opinions about the condition of their community, about the quality of its facilities, services and opportunities. How they interpret these conditions, whether they believe them to be having a positive or an adverse impact on their lives, may depend not only on the circumstances at any one moment in time but also on how things have been changing and can be expected to change in the future. Judgments about the present, therefore, occur in a context; the direction and rate of change is an important component of this context.

In what respects do Americans believe that their communities have been changing for the better or for the worse? What kinds of changes can be anticipated for the future? What are the perceived trends in cities, in suburbs, and in rural areas?

Questions 15(a) and (b) asked respondents whether they believe that their community has changed — getting much better, slightly better, slightly worse, or much worse — or has stayed about the same in the past two years, with respect to:

- Public services
- Public schools
- Leisure-time facilities
- Job opportunities
- Condition of housing
- Physical characteristics of the city
- Quality of air and water and the level of noise
- The people who live here and their attitudes toward you

They were then asked what they think will happen in the next two years.

Some Highlights of the Data

- People who live outside of SMSAs are more likely than those within SMSAs to believe public services, housing and the physical characteristics of their areas are changing for the better. Residents of central cities are generally more likely than others to say that conditions are changing for the worse.
- More residents of communities which have been losing population than communities gaining population believe that local conditions — particularly jobs and housing — have been getting worse.
- More residents of central cities believe that things will get worse in their communities in the next two years than do suburban or non-SMSA residents. Central city residents point to housing conditions, the physical characteristics of their cities, and its natural environment as changing for the worse more frequently than they identify other deteriorating conditions.

1116

What Might Cause People to Change Their Place of Residence?

If the quality of life should begin or continue to deteriorate in a community, its residents may begin to consider moving or they may actually move to a different location. Some people, of course, may not be in a position to change their place of residence even if they wanted to, but knowing which conditions prompt people to consider moving gives an indication of the contribution of these conditions to personal satisfaction and well-being.

When do perceptions about the quality of one's community begin to stimulate behavior? Under what conditions — such as deterioration in public services, the quality of local schools, job opportunities, housing conditions, or environmental quality — will people consider moving to another place? Under what conditions will they definitely decide to move?

In question 15(c), respondents were asked whether they would definitely, probably, probably not, or definitely not consider moving if the following get worse in the next few years:

— Public services
— Public schools
— Leisure-time facilities
— Job opportunities
— Conditions of housing
— Physical characteristics of the community
— Quality of air and water and noise level
— The people who live here and their attitudes toward you

Some Highlights of the Data

- For each of the categories listed above except leisure-time facilities, about 10 percent of the public say that they would definitely move from their present location if conditions in their community get worse in the next few years. When added to those who say they would probably consider moving, betweeen 26 percent and 31 percent of all Americans indicate that changing community conditions might cause them to move.
- Widowed persons are less likely than others to say that they might move if conditions changed for the worse in their community. Single, separated and divorced persons indicate a greater-than-average likelihood of moving if conditions such as jobs and housing get worse.
- Renters more frequently than homeowners say that they would probably or definitely consider moving if conditions — especially public services, jobs, housing, air and water quality, and noise levels — change for the worse.

Will Americans Move If Local Conditions Get Worse?

Percent of Respondents Who Would Definitely or Probably Consider Moving If Selected Conditions Got Worse in the Next Two Years, by Respondent Locale

How Many Americans Plan to Move in the Near Future?

The type of communities Americans decide they want to live in and the population movements that these preferences stimulate have a significant effect on the viability of each type of community and, consequently, on the quality of life that each provides. The numbers and characteristics of people who choose to live in the nation's cities, suburbs, small towns and rural areas, as well as the rate of population change that these places experience, affect the tax base, the amounts and kinds of public and private services that are needed, the attitudes and behaviors of residents and the social climate that is created.

How many people plan to move from their present homes in the next few years? Where do they plan to move — to cities, suburbs, small towns or rural areas? What are the characteristics of those who plan to move to each type of place — for example, are they young or old, married or single, middle-income or lower income?

Questions 16 and 18 both deal with peoples' plans to move during the next two years. In Question 16 respondents were asked which of the following best described their intentions regarding moving:

— Definitely will move
— Probably will move
— Probably will not move
— Definitely will not move
— Not sure

Question 18 was used to ask individuals who said that they definitely or probably would move during the next two years which kinds of places they would be likely to move to.

Some Highlights of the Data

- Almost a third (30%) of all Americans intend to move from their current residence during the next two years. City dwellers are more likely to anticipate moving than are residents of suburbs or small towns.
- Almost half (47%) of all city residents who expect to move during the next two years intend to relocate in large cities, and somewhat fewer of them (45%) will move to suburbs or small towns. Of all suburban residents who plan to move, more than three quarters (80%) of them expect to find new homes in suburbs or small towns while only 13% expect to move to cities. Most (87%) small town and rural residents who intend to move in the coming two years expect to be living in suburbs and small towns.

THE 1978 HUD SURVEY ON THE QUALITY OF COMMUNITY LIFE: QUESTIONAIRE (CENTRAL CITY VERSION)

1324

1a. (HAND RESPONDENT CARD "A") Which phrase on the card do you feel most accurately describes the place where you live?

1b. Which phrase do you feel most accurately describes the place where you were living just before you moved to this city?

1c. Which phrase best describes the place where you lived the longest when you were growing up?

1d. Please tell me all of the types of places where you have lived.

1e. (FOR EACH PLACE IN 1d) How many years did you live in (place)?

1f. Considering all of the types of places where you have lived, which have you liked the best as a place to live?

1g. If you could live anywhere you wanted to, which one of the kinds of places listed on the card would be your very first choice?

1h. (IF ANSWER IN 1g IS DIFFERENT FROM ANSWER IN 1a) What is preventing you from moving to that type of place?

CARD A

Large city (250,000 population or more)
Medium-sized city (50,000 to 250,000 population) in the suburbs
Medium-sized city (50,000 to 250,000) population not in the suburbs
Small city, town or village (under 50,000 population) in the suburbs
Small city, town or village (under 50,000 population) not in the suburbs
Rural area

1i. (ASK EVERYONE) Have you ever lived in a suburb of this city?

1j. (IF "HAVE LIVED THERE" IN 1i) How long did you live in the suburbs of this city?

Under 6 months
6 months to 1 year
Over 1 year, to 3 years
Over 3 years, to 5 years
Over 5 years, to 10 years
Over 10 years
Not sure

2a. (ASK EVERYONE) Now, how long have you lived within the city limits of (name of city)?

2b. And how long have you lived in this (house/apartment building)?

(1) Under 6 months
(2) 6 months to 1 year
(3) Over 1 year, to 3 years
(4) Over 3 years, to 5 years
(5) Over 5 years, to 10 years
(6) Over 10 years
(7) All my life
(8) Not sure

3a. (ASK ALL EXCEPT "all my life" in 2b — SKIP "ALL MY LIFE" to 4a) (HAND RESPONDENT CARD B) I'd like to read you some reasons other people have given us for moving to this city. For each one would you please tell me how important that reason was to you in deciding to move here — very important, important, not too important, or it didn't affect your decision to move here. (READ LIST)

CARD B

Very Important	Important	Not Too Important	Did Not Affect Decision

(1) Location was convenient to work.
(2) Housing was in the range I/we could afford.
(3) Housing was of the quality, type or size I/we wanted.
(4) Wanted to be near relatives or friends.
(5) Looking for green open spaces.
(6) Looking for convenient shopping.
(7) Looking for recreation, entertainment, or cultural activities.
(8) Looking for a safe neighborhood.
(9) Looking for good schools.
(10) Looking for good mass transportation (i.e., buses, subways, trains).
(11) Taxes were reasonable here compared to other places we considered.
(12) Because of ethnic and racial backgrounds of the people who lived here.
(13) Neighborhood was well kept.
(14) Made a job change.

3b. Which one of those reasons do you feel was the most important reason for deciding to move to this city?

3c. And which reason was the second most important reason for deciding to move to this city?

4a. (ASK EVERYONE) What do you think are the two or three major problems facing this city today?

4b. What do you think are the two or three major problems facing the suburbs around this city today?

132,

5. Next we want to find out how you feel about this city as a place to live. I am going to be asking you about several things so just tell me what number on this card represents how you feel. (HAND RESPONDENT CARD "C") (READ QUESTIONS)

CARD C	Delighted	Pleased	Mostly Satisfied	Mixed	Mostly Dissatisfied	Unhappy	Terrible

a. How do you feel about your present neighborhood as a place to live?*
b. How do you feel about this city as a place to live?
c. How would you feel about this city as a place to live if you considered only the available recreational, entertainment, or other leisure-time activities?
d. How would you feel about this city as a place to live if you considered only the amount of beauty and attractiveness it enables you to enjoy?
e. How would you feel about this city as a place to live if you considered only your safety?
f. How would you feel about this city as a place to live if you considered only the raising of children?
g. How would you feel about this city as a place to live if you considered only how much you are accepted by other people?
h. How do you feel about your house/apartment?

*Asked only of urban residents.

6a. (HAND RESPONDENT CARD "D") Here is a card listing some public services provided to neighborhoods. For each one I'd like you to rate it in this neighborhood. How would you rate the (READ FIRST ITEM ON LIST) in this neighborhood — excellent, pretty good, only fair or poor, or it is not available as a public service? (CONTINUE WITH LIST)

CARD D	Excellent	Pretty Good	Fair	Poor	Not Available

(1) Police protection
(2) Garbage collection
(3) Street lighting
(4) Fire Protection
(5) Public schools
(6) Parks and playground
(7) Road and street maintenance
(8) Public transportation
(9) Public health services in hospitals and clinics

6b. Which one of those services would you most like to see improved or made available in the next few years?

6c. And what is the next service you would most like to see improved or made available in the next few years?

7. I am going to read you some problems facing people in some cities. Please indicate whether you feel it is a severe problem, or not a problem at all in this city. (READ LIST)

(1) Crime
(2) Lack of medical care
(3) Condition of housing
(4) Traffic congestion
(5) Dirty streets and sidewalks
(6) Unemployment
(7) Lack of interesting things to do
(8) To many fires
(9) Air pollution
(10) Drug addiction
(11) Noise level
(12) Lack of parks
(13) Teen-age gangs
(14) Lack of childcare facilities

8. In general, would you say that people in your neighborhood keep pretty much to themselves, or do they get together quite a bit?

9. As far as (READ FIRST ITEM ON LIST) is concerned, where would you prefer to live — a neighborhood in which most people are the same as you, one in which most people are different from you, or one in which some people are the same as you and some are different from you? (CONTINUE WITH LIST)

(1) Leisure-time interests
(2) Level of education
(3) Income
(4) Age
(5) Race
(6) Religion
(7) Ethnic background or nationality
(8) Attitudes on political issues

10a. How would you describe the racial composition of your immediate neighborhood? Would you say it is all white, mostly white, about half white and half minority, or all minority?

10b. And what kind of neighborhood would you prefer to live in — a neighborhood that is all white, mostly white, about half white and half minority, mostly minority, or all minority?

10c. Do you consider yourself to be a member of a minority group?

10d. (IF "YES" IN 10c) Which group?

(1) American Indian or Alaskan Native
(2) Asian (Oriental) or Pacific Islander
(3) Black
(4) Hispanic
(5) Other (SPECIFY)
(6) Not Sure

11a. (ASK EVERYONE) Now a few questions about the government of this city. First, do you feel that (READ FIRST ITEM ON LIST) is very responsive, only slightly responsive, or not responsive at all to major concerns of the people of this city? (CONTINUE WITH LIST)

(1) Your local government
(2) The state government
(3) The federal government

11b. Do you feel that (READ FIRST ITEM ON LIST) is very wasteful, somewhat wasteful, only slightly wasteful, or not wasteful at all in its spending of tax dollars? (CONTINUE WITH LIST)

(1) Your local government
(2) The state government
(3) The federal government

12. How would you rate the financial condition of this city's government — excellent, pretty good, only fair or poor?

13a. Have you ever worked with others in this neighborhood to try to solve some local problem?

13b. Have you ever taken part in forming a new group or new organization to try to solve some neighborhood problem?

13c. Have you ever personally gone to see, or spoken to, or written to some local official about some need or problem?

13d. What about some representative or government official outside of the city—on the county, state or federal level. Have you ever contacted or written to such a person on some need or problem?

---

14. (HAND RESPONDENT CARD "A" AGAIN) If you had to pick only one of the places on that card, which would you say offers (READ FIRST ITEM ON LIST, THEN CONTINUE) . . . . .

Large City	Medium-Sized City in the Suburbs	Medium-Sized City Not in the Suburbs	Small City, Town or Village in Suburbs	Small City, Town or Village Not in Suburbs	Rural Area

(1) The best public schools
(2) The worst public schools
(3) The lowest taxes
(4) The highest taxes
(5) The best shopping facilities
(6) The worst shopping facilities
(7) The best housing
(8) The worst housing
(9) The least crime
(10) The most crime
(11) The least amount of racial discrimination
(12) The greatest amount of racial discrimination
(13) The best place to raise children
(14) The worst place to raise children

(INTERVIEWER:) Now, here are a few more items:

(15) The best clinics, hospitals, and health care facilities
(16) The best employment opportunities
(17) The best parks and playgrounds
(18) The best selection of restaurants
(19) The highest divorce rate
(20) The best selection of movie theatres
(21) The most plays, museum, and other cultural opportunities
(22) The best colleges and universities
(23) The lowest cost of living
(24) The best public transportation
(25) The friendliest people
(26) The greatest number of people who have attitudes similar to yours
(27) The widest range of housing that you can afford
(28) The best public services like garbage collection, street maintenance, fire and police protection
(29) The best place to live

The next several questions have to do with how you think this city has changed, if at all, in the past two years and how you think this city will change, if at all, in the next two years (HAND RESPONDENT CARD "E")

15a. Which one of the phrases in the upper part of the card best describes what you think has happened to you (READ FIRST ITEM ON LIST) in the *past* two years?

15b. Which one of the phrases in the upper part of that card best describes what you think will happen in the *next* two years? (READ FIRST ITEM ON LIST)

15c. Which one of the phrases in the lower part of the card best describes what you would do if (READ FIRST ITEM ON LIST, THEN REPEAT SERIES FOR REST OF QUESTIONS) gets worse in the next two years?

Card E

Much Better	Slightly Better	About Same	Slightly Worse	Much Worse

Definitely Consider Leaving	Probably Consider Leaving	Probably Not Consider Leaving	Definitely Not Consider Leaving

(1) Public services provided in this city—things like garbage collection, street conditions, fire and police protection and public transportation.
(2) Public schools in this city
(3) Leisure-time facilities available in this city—things like parks, playgrounds, restaurants, movies, plays and museums
(4) Job opportunities available in this city for people like yourself
(5) Condition of housing in this city
(6) Physical characteristics of this city—things like the condition of the streets, buildings and housing, the availability of parks, and the degree of crowding and congestion
(7) The natural environment of this city—things like the quality of air and water, and the amount of noise
(8) The social environment in this city—things like the people who live here and their attitudes toward you

16. Looking to the future for a moment, how likely are you to move in the next two or three years? Will you definitely move, probably move, probably not move, or definitely not move from this (house/apartment)?

17. (IF "DEFINITELY WILL MOVE" OR "PROBABLY WILL MOVE" IN 16) What are the two or three most important reasons you (will/might) move? Any others?

1331

18. (IF "DEFINITELY WILL MOVE" OR "PROBABLY WILL MOVE" IN 16) If and when you move, which one of the places on this card (HAND RESPONDENT CARD "F") do you think that you will most likely move to?

CARD F

1. Somewhere else in this neighborhood
2. A different neighborhood within this city
3. A suburb within this metropolitan area
4. A suburb outside this metropolitan area
5. A different large city
6. A small city, town or village
7. A rural area
8. Outside the United States

19. (ASK EVERYONE) To the best of your knowledge, when was the building that you are *living in* constructed?

20a. (HAND RESPONDENT CARD "G") Which letter on this card best represents your present home? In answering whether it is rented or owned, consider it for yourself or someone in this household.

20b. Which letter on this card best represents your last home?

20c. Which letter on this card best represents the type of home you lived in when you were 13-14 years old?

20d. Which letter on this card best represents the type of home you think your next home will be?

20e. I would like you to rank these possibilities in order of preference for your next home. Which would you most prefer as your next home? What is your next choice? And what is your next choice?

CARD G

A. Single-family detached house that you own
B. Single-family detached house that you rent
C. Single-family attached house that you own
D. Single-family attached house that you rent
E. Two-family house that you own
F. Two-family house that you rent
G. Apartment that you rent in low-rise building (no more than 3 stories)
H. Apartment that you own in low-rise building (condominium or cooperative)
I. Apartment that you rent in high-rise building (more than 3 stories)
J. Apartment that you own in high-rise building (condominium or cooperative)
K. Mobile home
L. Other (SPECIFY)
Not sure or not applicable (always lived here, certain will never move)

21a. How many separate bedrooms are there in this (house/apartment)?

21b. (ASK IF PRESENT HOME IS HIGH RISE BUILDING IN 20a, ITEM I or J — SKIP OTHERS TO 22) Is there an elevator in this building?

22a. (ASK IF PRESENT HOME IS RENTED IN 20a, ITEM B, D, F, G OR I — SKIP OTHERS TO INSTRUCTIONS ABOVE 23a) What is the usual amount paid each month for rent?

22b. Thinking back over the past year, what was the usual total amont that you paid each month for (READ FIRST ITEM ON LIST) or was it included in your rent? (CONTINUE WITH LIST)

(1) Electricity
(2) Gas/heating oil/other fuel
(3) Water

(INTERVIEWER: ASK 23a-c IF PRESENT HOME IS OWNED IN 20a, ITEM A,C,E,H,J, OR K — SKIP OTHERS TO 24a)

1333

23a. Do you have a mortgage or other loan on your (house/apartment) at present?

23b. Thinking back over the past year, what was the usual total amount you paid each month for (READ FIRST ITEM ON THE LIST) or was it included in your mortgage payment or maintenance? (CONTINUE WITH LIST)

(1) Homeowners insurance
(2) Mortgage payment
(3) Electricity
(4) Gas/heating oil/other fuel
(5) Water
(6) Property tax

23c. How much do you think that this (house and lot/apartment) would sell for in today's market?

Under $10,000
$10,000 - $14,999
$15,000 - $19,999
$20,000 - $24,999
$25,000 - $29,999
$30,000 - $39,999
$40,000 - $49,999
$ 50,000 - $ 59,999
$ 60,000 - $ 79,999
$ 80,000 - $ 99,999
$100,000 - $124,999
$125,000 - $149,999
$150,000 or more
Not sure

24a. (ASK EVERYONE) In the past 6 months has the total value of all repairs and improvements made on this (house/apartment) been under $100, $100 or over, or have no repairs or improvements been made at all?

24b. (IF $100 OR OVER IN 24a) What was repaired or improved?

(1) Built an addition to the house
(2) Roof
(3) Plumbing
(4) Inside paint, plaster
(5) Electrical system
(6) Heating or air-conditioning
(7) Inside walls, ceilings or floors
(8) Exterior of the house or foundation
(9) Re-modeled one or more rooms
(10) Insulation
(11) Other (SPECIFY)
(12) Not sure

24c. (ASK EVERYONE) Are there now repairs worth over $100 that need to be done?

24d. (IF YES IN 24c) Could you tell me why they have not yet been done?

25. (ASK EVERYONE) As far as you know, is there a government subsidy or assistance program which reduces (the rent/mortgage payments on your home) (the rent on your apartment)?

1334

132

26a. Do you feel that the federal government should assist (READ FIRST ITEM ON LIST) in meeting their housing needs? (CONTINUE WITH LIST)

(1) Handicapped persons
(2) Low income families
(3) Moderate income families
(4) Elderly persons with low income
(5) Elderly persons with moderate income

26b. For a family of four in this city to be considered a low income family, what would you think should be the upper limit of their annual income?

Under $3,000
$3,000 - $4,999
$5,000 - $5,999
$6,000 - $6,999
$7,000 - $7,999
$8,000 - $8,999
$9,000 - $9,999
$10,000 - $11,999
$12,000 - $13,999
$14,000 - $15,999
$16,000 - $17,999
$18,000 - $19,999
$20,000 or more
Not sure

27. To what extent do you feel promoting racially integrated neighborhoods should be a goal of government housing programs — should it be a major goal, an important but not major goal, only a minor goal, or not a goal at all?

28a. We often distinguish between who should provide funds for public services and who should actually run them. I'm going to read you several public services. First, for each one tell me, in your opinion, which level of government should be most responsible for *paying* for the service — local government, state government, the federal government in Washington, or no government? The first one is (READ FIRST ITEM) — should the local, state or federal government, or no government, pay for that? (THEN ASK 28b)

28b. Now tell me which level of government should be most responsible for *running* (READ FIRST ITEM): local government, state government, the federal government in Washington, or no government? (THEN, ASK 28a FOR NEXT ITEM ON LIST)

(1) Public transportation
(2) Air and water quality control
(3) Law enforcement
(4) Employment and job training
(5) Social services for the elderly
(6) Public education
(7) Health services
(8) Housing assistance to the poor
(9) Improvement of run-down city areas
(10) Cultural facilities, such as libraries, concerts, museums

29. In your opinion, which level of government — local, state, federal — gives you the most for your tax dollars?

30a. (HAND RESPONDEDNT CARD "H") I'd like to read you some statements other people have made, and for each one tell me if you strongly agree, slightly agree, slightly disagree, or strongly disagree. (READ STATEMENT)

CARD H

Strongly Agree	Slightly Agree	Slightly Disagree	Strongly Disagree

(1) The federal government should guarantee everyone a minimum standard of living.
(2) The federal government ought to see to it that everbody who wants to work can find a job.
(3) If cities and towns need to rebuild houses, schools, and neighborhoods, the federal government should help.
(4) The federal government ought to help people get medical care at low cost.

30b. Some people think that the federal government should do more in trying to deal with such problems as unemployment, education, housing and so on. Others think the federal government is already doing too much. On the whole, would you say that the federal government should do more, should do less, or should continue as is?

31a. Think back for a moment to when you were growing up. I'd like to compare some things about cities and city life then, with the way they are now. Consider large cities here — that is, those having a population of 250,000 or more. When you were growing up would you say (READ FIRST ITEM ON LIST. THEN ASK 31b)

31b. Would you say this is still the case? (THEN ASK 31c)

31c. Have things in the city changed for the better or worse in this respect? (THEN ASK 31a FOR THE NEXT ITEM ON THE LIST)

(1) The best shopping was in the city.
(2) The best housing was in the city.
(3) The city was the best place to find restaurants, entertainment, and cultural activities.
(4) There wasn't much crime in the city.
(5) The best opportunities for advancement were in the city.

32a. There are some people who believe that our society could exist nicely without cities. If there were no cities in this country, do you think America would be a better place, a worse place or wouldn't it make much difference either way?

32b. Why do you feel America would be (answer in 32a)? Any other reason?

33a. How many children do you have who live at home?

33b. (IF ANY CHILDREN IN 33a) What age (s) (is your child/are your children)?

33c. (IF CHILDREN AGED 5 to 21) (Does your child/Do your children) attend a public, private, or church-related school in this city?

Public school in this city
Private school in this city
Church-related school in this city
School outside this city
Does not attend school
Not sure

33d. (IF CHILDREN UNDER 21) When your children are grown up and have their own families, would you want them to live in a city like this or in some other place?

33e. (IF "SOME OTHER PLACE" IN 33d) Why would you want them to live in some other place? Any other reason?

33f. (IF "SOME OTHER PLACE" IN 33d, HAND RESPONDENT CARD "A") Which kind of place on this card most accurately describes the place where you would most want your children to live?

Large city
Medium-sized city in the suburbs
Medium-sized city not in the suburbs
Small city, town or village in the suburbs
Small city, town or village not in the suburbs
Rural area
Always lived here
Not sure

34a. (ASK EVERYONE) Now I would like to ask you about some of your activities. (HAND RESPONDENT CARD "I") How often do you (READ FIRST ITEM ON LIST) *in* the city — almost every day, once or twice a week, a couple of times a month, once a month, a few times a year, once a year, or less often than that? (CONTINUE WITH LIST)

34b. Now, how often do you (READ FIRST ITEM ON LIST) outside the city — almost ever day, once or twice a week, a couple of times a month, once a month, a few times a year, or less often than that? (CONTINUE WITH LIST)

CARD I

Almost Every Day	Once or Twice A Week	Couple Times A Month	Once A Month
Few Times A Year	Once A Year	Less Often Than That	

(1) Go to a movie
(2) Go to a museum or see a live play or a concert
(3) Buy furniture or a major appliance
(4) Buy some new clothes
(5) Go out and have a nice dinner
(6) Attend religious servies
(7) Go to see a live sports event
(8) Visit friends
(9) Go to a doctor

35a. Is the head of this household male or female?

Male
Female
Both head of household
Not Sure

35b. How does the head of the household usually get to and from work?

35c. (IF MORE THAN ONE MEANS in 35b) Which *one* means of transportation does the head of the household use to travel the greatest distance when going to and from work?

Private automobile, no passengers
Private automobile with passengers or car pool
Taxi
Bus
Subway
Commuter railroad
Walk
Bicycle
Other (SPECIFY)
Works at home
Not employed
Not sure

35d. (ASK EVERYONE EXCEPT "NOT EMPLOYED" AND "WORKS AT HOME" IN 35b — SKIP THEM TO 36a) About how long does it take the head of household to get to work?

Under 10 minutes
10 to 19 minutes
20 to 29 minutes
30 to 39 minutes
40 to 49 minutes
50 to 59 minutes
1 hour to 1 hour 30 minutes
More than 1 hour 30 minutes
Not sure

35e. Where does the head of household work – in this city, in the suburbs, or somewhere else?

36a. (ASK EVERYONE) Is the head of household single, married, widowed or separated?

Single (SKIP to 37a)
Married (ASK 36b)
Widowed
Divorced
Separated (SKIP TO 37a)
Not sure
Refused

36b. (ASK IF "MARRIED" IN 36a — OTHERS SKIP TO 37a) Does the head of household's spouse work?

36c. (IF "WORKS" IN 36b) How does she(he) usually get to and from work?

36d. (IF MORE THAN ONE MEANS IN 36c) Which *one* means of transportation does she(he) use to travel the greatest distance when going to and from work?

Private automobile, no passsengers
Private automobile with passengers or car pool
Taxi
Bus
Subway
Commuter railroad
Walk
Bicycle
Other (SPECIFY)
Works at home
Not sure

36e. (ASK ALL WHO WORK EXCEPT "WORKS AT HOME" IN 36c — SKIP THEM TO 37a) About how long does it take her (him) to get to work?

Under 10 minutes
10 to 19 minutes
20 to 29 minutes
30 to 39 minutes
40 to 49 minutes
50 to 59 minutes
1 hour to 1 hour 30 minutes
More than 1 hour 30 minutes
Not sure

36f. Where does she(he) work — in this city, in the suburbs, or somewhere else?

37a. (ASK EVERYONE) If you had a choice, would you live in a slightly less desirable home near the main breadwinner's place of employment, or would you prefer to live in a slightly more desirable home that was an hour away from the place of employment?

37b. (IF "MORE DESIRABLE HOME" IN 37a) Suppose the slightly more desirable home were an hour-and-a-half away from the breadwinner's place of employment. Would you still choose the slightly more desirable home or would you then live in a slightly less desirable home near the place of employment?

38a. (ASK EVERYONE) There is quite a bit of talk these days about different social classes. Most people say they are in the upper class, upper middle class, lower middle class, working class or lower class. Which class do you think of yourself being in?

38b. When you were age 13-14, which class do you think that your family was in?

38c. Five years from now, which class do you think you will be in then?

FACTUAL (TO BE ASKED OF EVERYONE):

F1a. What is your position in this household?

1341

Male head
Female head (no male head)
Wife
Son
Daughter
Other (SPECIFY)
Not sure
Refused

F1b. How many people live in this household?

F2a. (HAND RESPONDENT CARD "X") Please look at this card and tell me which letter *best* represents the head of household's current employment status.

F2b. (IF HEAD OF HOUSEHOLD IS MARRIED) Please look at this card and tell me which letter best represents the spouse of the head of the household's current employment status.

CARD X

A. Employed full-time (35 hours a week or more)
B. Employed part-time (less than 35 hours a week and not seeking a full-time job)
C. Employed part-time (less than 35 hours a week) and seeking full-time job
D. Not employed and seeking work
E. Not employed and not seeking work
F. Not employed because work is seasonal
G. Temporarily laid off
H. Retired
I. Student
J. Military service
K. Housewife
L. Other (SPECIFY)

F2c. Has the head of the household collected unemployment insurance at any time within the last twelve months?

F2d. (ASK IF HEAD OF HOUSEHOLD EMPLOYED, NOT EMPLOYED, TEMPORARILY LAID OFF, OR RETIRED IN F2a — OTHERS SKIP TO F3) What type of work does (did, IF RETIRED) the head of household do? (PROBE FULLY, FINDING OUT WHAT THE JOB IS CALLED, DUTIES INVOLVED, ETC., IN ORDER TO CATEGORIZE CORRECTLY BELOW.)

Professional
Manager, official, proprietor
Clerical worker
Sales worker
Skilled craftsman, foreman
Operative, unskilled laborer (except farm)
Service worker
Farmer, farm manager, farm laborer
Other (SPECIFY)
Refused

F3. (ASK EVERYONE) Are you single, married, widowed, divorced, or separated?

Single
Married
Widowed
Divorced
Separated
Not sure
Refused

F4. In what age group are you?

18 - 20 years
21 - 24 years
25 - 29 years
30 - 34 years
35 - 39 years
40 - 44 years
45 - 49 years
50 - 54 years
55 - 59 years
60 - 64 years
65 - 74 years
75 and over
*Refused

* IF RESPONDENT REFUSES, ESTIMATE HIS/HER AGE, AND RECORD FOR "REFUSED" AS WELL AS THE AGE GROUP ESTIMATED.

F5. (HAND RESPONDENT CARD "J") Would you please look at this card and tell me which letter represents the highest grade of school that you actually completed?

CARD J

No formal schooling (0 years)
First through seventh grade (1-7 years of school completed)
Eighth grade (8 years of school completed)
Some high school (9-11 years of school completed)
High school graduate (12 years of school completed) or equivalent
Some college (1-3 years of college completed)
Two-year college graduate (completed 2 years of community college, etc.) or
  post-high school vocational school graduate
Four-year college graduate (completed 4 years of college)
Post graduate (4 year college graduate and complete at least 1 year of graduate school)

F6. Are you a member of a labor union, or is any other member of this household a member of a labor union?

F7. For statistical purposes only, we need to know your total family income for 1977. Will you please look at this card (HAND RESPONDENT CARD "K") and tell me which letter best represents all the money the members of this family will have earned or received, such as welfare, pensions, stocks, bonds, real estate and other investments, income from a business, before taxes in 1977.

CARD K

A. Under $3,000
B. $3,000 to $4,999
C. $5,000 to $5,999
D. $6,000 to $6,999
E. $7,000 to $7,999
F. $8,000 to $8,999
G. $9,000 to $9,999
H. $10,000 to $10,999
I. $11,000 to $11,999
J. $12,000 to $12,999
K. $13,000 to $13,999
L. $14,000 to $14,999
M. $15,000 to $16,999
N. $17,000 to $19,999
O. $20,000 to $24,999
P. $25,000 to $29,999
Q. $30,000 to $39,999
R. $40,000 to $49,999
S. $50,000 to $74,999
T. $75,000 to $99,999
U. $100,000 and over

INTERVIEWER: IF "NOT SURE" OR "REFUSED," RECORD FOR "NOT SURE/REFUSED," AND RECORD FOR THE AMOUNT YOU ARE ESTIMATING.

OTHER REPORTS PREPARED BY THE DIVISION OF POLICY STUDIES

Office of Policy Development and Research
U.S. Department of Housing and Urban Development

Subsidized Housing:

Causes of Multifamily Defaults (Staff Study, July 1975)

Description of the patterns of mortgage default, assignment and foreclosure for the Section 236 multifamily subsidized housing program; analysis of these patterns to determine the causes of default; review of potential policy options to deal with the default problem.

Multifamily Property Disposition (Staff Study, October 1975)

Estimates of the costs associated with alternative methods of disposition for HUD's inventory of foreclosed, formerly subsidized multifamily properties.

Housing Production with Non-Profit Sponsors (Preliminary Report, November 1975)

Comparison of the characteristics of non-profit sponsored and limited dividend sponsored housing projects; discussion of the Section 106 program which provides technical assistance funds and no interest seed money loans to non-profit sponsors; analysis of the cost of non-profit sponsorship.

Public Housing Operating Subsidies (Staff Study, December 1975)

Review of the factors contributing to the deteriorating financial position of Local Housing Authorities (LHAs) prior to 1973; analysis of income, expense and vacancy trends; consideration of various strategies for limiting the Federal contributions to the operating deficits of LHAs.

Section 8 Housing Assistance Payments Program: Existing Housing (Field Study, August 1976; Policy Paper, August 1976)

First year assessment of the impact (on participant families, units, landlords and Public Housing Authorities) and administration (including program start-up, rent-up and operations phases) of HUD's rental assistance program for existing housing.

Section 8 Housing Assistance Payments Program: The Loan Management Set-Aside (Field Study, January 1977; Policy Paper, January 1977)

Profile of multi-family housing projects that were assisted with funds set aside specifically to improve the condition of financially troubled, HUD-insured or HUD-held projects; preliminary assessment of the program's impacts on projects, tenants and others; analysis of the administrative conditions that affected program outcomes.

Issues in Indian Housing (Background Paper, August 1977)

Identification of major issues associated with the delivery of HUD's Indian Housing Program; consideration of options for evaluating the Program.

Preliminary Findings from the Field Study: Report of the Task Force on Multifamily Property Utilization (Field Study, August 1977)

Estimation of the types and frequency of problems facing financially troubled HUD-insured, subsidized multifamily housing projects; assessments of the adequacy of project income, HUD management and project management.

Section 202: Housing for the Elderly or Handicapped (Field Study, March 1978)

Evaluation of the design, administration, cost and performance of HUD's program of direct loans to nonprofit organizations for the purpose of developing and operating multifamily housing projects for elderly or handicapped persons.

Unsubsidized Housing

Disposition of Foreclosed Houses (Staff Study, August 1975)

Review of HUD's property disposition policy and activities; consideration of alternative property disposition objectives and of strategies for achieving these objectives.

HUD-FHA Condominiums: Their Future (Staff Study, August 1975)

Analysis of the demand for, objectives of, and possible modification to the Section 234 condominium insurance program.

Title X: Retrospect and Prospect (Preliminary Report, December 1975)

Evaluation of HUD's experience with Title X which provides mortgage insurance to assist private developers in obtaining private financing for land acquisition and development; assessment of the program's potential in light of subsequent legislative changes, market conditions, and HUD's land use policy.

Community Planning and Development

Coordination of Federal Planning Programs (Staff Study, October 1975)

Review of the various planning subsidies offered by the Federal government to state and local governments; consideration of various options for alternative organizational forms.

Allocation Issues in Section 701 Planning Grants (Staff Study, October 1975)

Review of the Section 701 Comprehensive Planning Assistance program in light of two, alternative Federal objectives: either encouraging planning activities, in general; or encouraging selected types of planning.

Consumer Affairs

Counseling for Delinquent Mortgagors (Staff Study, November 1975); *Counseling for Delinquent Mortgagors II* (Staff Study, February 1977)

Evaluations of the impact and cost-effectiveness of demonstration programs of default and delinquency counseling provided to homeowners who had obtained mortgages under the Section 235 program.

Consumer Reaction to Advance Disclosure of Settlement Costs (Preliminary Report, December 1975)

Report of a telephone survey of home buyers' experiences with and reactions to the advance disclosures provisions of the Real Estate Settlement Procedures Act of 1974.
